

Contents

- 185 Recycle of waste backwash water in ultrafiltration drinking water treatment processes
Stephanie Leah Gora and Margaret Evelyn Walsh
- 197 A comparison of the Eulerian and particle tracking approaches for prediction of ozone contactor performance
Jianping Zhang, Peter M. Huck, Gordon D. Stublely and William B. Anderson
- 210 Electrochemically activated water as an alternative to chlorine for decentralized disinfection
K. Ghebremichael, E. Muchelemba, B. Petrusevski and G. Amy
- 219 Problematic algae in the sedimentation and filtration process of water treatment plants
Gyeongje Joh, Yang Soon Choi, Jae-Ki Shin and Jiyoung Lee
- 231 NOM reactivity with chlorine in low SUVA water
Yanfang Liu, Qishan Wang, Suo Zhang, Jinfeng Lu and Shangchao Yue
- 240 Autocalibration of dynamic bacterial growth model for water distribution system using GA
G. R. Munavalli and M. S. Mohan Kumar
