Contents

67 Coagulant mixing revisited: theory and practice
   James K. Edzwald

78 Failure mechanisms and condition assessment of PVC push-fit joints in drinking water networks
   André Marques Arsénio, Ilse Pieterse, Jan Vreeburg, Rob de Bont and Luuk Rietveld

86 Drinking water: the problem of chlorinous odours
   S. McDonald, C. A. Joll, A. Lethorn, C. Loi and A. Heitz

97 The predictive value of total coliforms in drinking water using life table analysis
   Corinne A. Krentz, Kay Teschke, Hui Shen and Judith Isaac-Renton

107 Effects of pipe materials, orthophosphate, and flow conditions on chloramine decay and NDMA formation
     in modified pipe loops
   Hong Zhang and Susan A. Andrews

120 Formation of aldehyde during ozonation of taste and odour compounds in water
   Fei Qi, Bingbing Xu, Li Feng, Zhonglin Chen, Liqiu Zhang and Dezhi Sun
