Contents

391 Sensitivity analysis for water supply input parameters of the CLARA simplified planning tool using three complementary methods
   Atekelt Abebe Ketema and Guenter Langergraber

404 Improved modelling of ‘long-term’ future performance of drinking water pipes
   A. Large, Y. Le Gat, S. M. Elachachi, E. Renaud, D. Breysse and M. Tomasion

415 Changes in water biostability levels during an ion-exchange process using Miex-DOC resin
   Małgorzata Wolska

425 Removal of V(V) ions from aqueous solutions using oxidized multi-walled carbon nanotubes
   S. Sobhanardakani, R. Zandipak, Z. Fili, M. Ghoochian, R. Sahraei and A. Farmany

434 Reduction of ripening time of full-scale manganese removal filters with manganese oxide-coated media
   Jantinus H. Bruins, Branislav Petrusevski, Yness M. Slokar, Koen Huysman, Koen Joris, Joop C. Kruithof and Maria D. Kennedy

442 Low affinity of heterotrophic bacteria to loose deposits in drinking water distribution systems

450 Effectiveness in chlorite removal by two activated carbons under different working conditions: a laboratory study
   Sabrina Sorlini, Maria Cristina Collivignarelli and Matteo Canato

462 Application of OpenModelica® in the mathematical modeling and simulation of general copper pipe corrosion
   Glarius N. Nyongbela and Klaus Johannsen

470 A preliminary feasibility study for a backup water supply-coastal reservoir in Southeast Queensland, Australia
   Shu-Qing Yang

486 Determination of domestic water meter accuracy degradation rates in Uganda
   Deanroy Mbabazi, Noble Banadda, Nicholas Kiggundu, Harrison Mutikanga and Mohammed Babu
