Aims and Scope
The Journal of Water Supply: Research and Technology - AQUA is a quarterly international journal. It publishes peer-reviewed research, review, and practical papers dealing with research and development in water supply technology and management covering the complete water cycle. The journal's scope includes:

- Sustainable water resources management
- Source water quality, quantity, protection
- Applied hydrology
- Hydraulic systems including source waters, treatment, and distribution systems
- Water treatment processes, residuals treatment and management
- Modeling of source waters, treatment and distribution systems
- Applied methods to characterize water quality
- Distribution systems
- Water system management and policy
- Legislation, economics, public relations, crisis management
- Public health, risk assessment, regulations and standards
- Water reclamation and reuse (e.g. for agricultural or industrial use)
- Irrigation
- Desalination systems for water supply

Submission
All manuscripts should be submitted electronically through our Online Submission and Peer Review System: https://www.editorialmanager.com/jwsrtaqua. Authors should prepare their papers in accordance with the current Instructions for Authors printed at the back of this journal, and also available at www.iwaponline.com or from the Editorial Office at the address given inside the back cover.
