Contents

641 Carbon nanotubes and graphenes as adsorbents for adsorption of lead ions from water: a review
   Jyoti Chawla, Rajeev Kumar and Inderpreet Kaur

660 Assessment of metrics for resilient design of water distribution networks
   Kalyan R. Piratla and Samuel T. Ariaratnam

670 Ranking of conceptualized groundwater models based on model information criteria
   Majid Ehtiat, S. Jamshid Mousavi and Abbas Ghaheri

688 Development of efficient characterization parameters for activated carbon used in drinking water treatment
   Lucas Landwehrkamp, Arman Kouchaki-Shalmani, Claudia Forner, Ralph Hobby, John Eduful and Christoph Wagner

697 Optimization design based on ensemble surrogate models for DNAPLs-contaminated groundwater remediation
   Haibo Chu and Wenxi Lu

708 MIKE 11 model-based water quality model as a tool for the evaluation of water quality management plans
   J. Liang, Q. Yang, T. Sun, J. D. Martin, H. Sun and Lei Li

719 Validation of two applied methods of groundwater vulnerability mapping: application to the coastal aquifer system of Southern Sfax (Tunisia)
   Nabila Allouche, Fatma Ben Brahim, Mona Gontara, Hafedh Khanfir and Salem Bouri

738 Bacterial biofilms formed in arsenic-containing water: biodeterioration of water network materials
   Silvia E. Rastelli, Blanca M. Rosales, Marisa R. Viera and Cecilia I. Elsner

749 New electrochemical sensor for sensitive quantification of copper in river, city, bottled and drinking water samples
   R. Heidarimoghaddam, S. S. Mortazavi and A. Farmany

755 Biodiversity of cyanobacteria in Tunisian freshwater reservoirs: occurrence and potent toxicity – a review
   Afef Fathalli, Mohamed S. Romdhane, Vitor Vasconcelos and Amel Ben Rejeb Jenhani
