

**Contents**

- 583 A comprehensive review on the challenges of cured-in-place pipe (CIPP) installations  
**Susen Das, Alireza Bayat, Leon Gay, Mahmoud Salimi and John Matthews**
- 597 Modeling and analysis of chlorine dioxide, chlorite, and chlorate propagation in a drinking water distribution system  
**Sabrina Sorlini, Michela Biasibetti, Francesca Gialdini and Alessandro Muraca**
- 612 Modeling the effect of weather conditions on urban water demand in multiple network areas: a practical approach to improve monthly and seasonal operation  
**Marta Cabral, Aisha Mamade, Dália Loureiro, Conceição Amado and Dídia Covas**
- 626 Low-temperature effects on the removal of soluble manganese in MnO<sub>x</sub>(s)-coated media systems  
**Racheal Cooley and William R. Knocke**
- 635 Zirconium and chitosan coagulants for drinking water treatment – a pilot study  
**Ekaterina Christensen, Tor Håkonsen, Lucy J. Robertson and Mette Myrnel**
- 645 Iron oxide impregnated sugarcane bagasse waste material as sorbent for As(III) removal from water: kinetic, equilibrium and thermodynamic studies  
**Ashish Nashine and Ajay Tembhurkar**
