## Contents

141  Optimal location of artificial recharge of treated wastewater using fuzzy logic approach  
    Alireza Ghasemi, Bahram Saghafian and Saeed Golian

157  Interactions between ammonia, iron and manganese removal using pilot-scale biofilters  
    Qingfeng Cheng, Lichao Nengzi, Linlin Bao, YiJing Wang, Jianxing Yang and Jie Zhang

166  Artificial intelligence for predicting solar still production and comparison with stepwise regression under  
    arid climate  
    Ahmed F. Mashaly and A. A. Alazba

178  Photocatalytic degradation of aniline in water using CuO nanoparticles  
    Samira Norzaee, Babak Djahed, Razieh Khaksefidi and Ferdos Kord Mostafapour

186  Comparison between an intrinsic and a specific vulnerability method using a GIS tool: case of the Smar  
    aquifer in Maritime Djeffara (southeastern Tunisia)  
    Bachaer Ayed, Ikram Jmal, Samir Sahal, Fatma Ben Brahim, Emna Boughariou, Naziha Mokadem  
    and Salem Bouri

199  Comparison of the water purification efficiency of two different flocculation-sediment-filtration (FSF)  
    processes in Chaohu Lake in China  
    Wei Xu, Jie Song, Yunchang Peng, Wei Qin and Lin Shen

207  Fuzzy analytic hierarchy process approach in drought management: case study of Gorganrood basin, Iran  
    Seyed-Mohammad Hosseini-Moghari, Shahab AraghiNejad and Ali Azarnivand
