

Contents

- 219 Variability of water residence time and free chlorine and disinfection by-product concentrations within a residential neighborhood
Simon Rochette, Geneviève Pelletier, Christian Bouchard and Manuel Rodriguez
- 229 Formation of disinfection by-products during the monochloramination of co-existing *Microcystis aeruginosa* and *Cyclops* metabolites
Biyao Song, Xingbin Sun, Shusong Zhang, Yifeng Jiang and Jiameng Liu
- 239 Efficient removal of some anionic dyes from aqueous solution using a polymer-coated magnetic nano-adsorbent
Armin Kiani, Pouya Haratipour, Mazaher Ahmadi, Rouhollah Zare-Dorabei and Ali Mahmoodi
- 249 The use of potassium permanganate, ozone and associated coupled processes for odor removal in drinking water: bench and pilot scale tests
Qiulai He, Hongyu Wang, Lin Zhong, Kai Yang and Zhuocheng Zou
- 257 Photochemical fate of the vasodilator drug pentoxifylline in surface waters
Webber Wei-Po Lai, Chau-Shuen Kang and Angela Yu-Chen Lin
- 266 Groundwater level response to hydrogeological factors in a semi-arid basin of Beijing, China
Xiaomin Gu, Yong Xiao, Shiyang Yin, Jingli Shao, Xingyao Pan, Yong Niu and Junxiong Huang
- 279 Effect of saltwater intrusion due to over-exploitation and earthquakes on mineralization processes of spring waters over the Massif Bokkoya (central Rif, Morocco)
E. Gharibi, M. Ghalit, J.-D. Taupin and A. Lamhamdi
