Pernille Ingildsen

Hillerød Forsyning, Solrødgårds Alle 6, 3400 Hillerød, Denmark

Shuming Liu

School of Environment, Tsinghua University, Beijing 100084, China

Manging Editor

Fanlin Meng

Centre for Water Systems, College of Engineering, Mathematics and Physical Sciences, University of Exeter, North Park Road, Exeter EX4 4QF, UK

Associate Editors

Biniyam Ashagre, Anglia Ruskin University, UK

Gemma Carr, Vienna University of Technology, Austria

Wenhai Chu, Tongji University, China

Xin Dong, Tsinghua University, China

Huan-Feng Duan, Hong Kong Polytechnic University, Hong Kong

Stacy Langsdale, US Army Corps of Engineers, USA

Monica Rivas Casado, Cranfield University, UK

Ramesh Saagi, Lund University, Sweden

Ashok K Sharma, Victoria University, Australia

Saroj Kumar Sharma, IHE Delft Institute for Water Education, The Netherlands

Riccardo Taormina, TU Delft, The Netherlands

Qi Wang, Guangdong University of Technology, China

Guangxue Wu, Tsinghua University, China

International Editorial Board

Dr H Alegre, National Laboratory of Civil Engineering, Portugal

Professor Dr Ing. H Bode, Ruhrverband, Germany

Professor D Bursill, University of South Australia, Australia

Prof. P-C Chiang, National Taiwan University, Taiwan

Prof. Dr L Di Bernardo, University of Sao Paulo, Brazil

Prof. E Drioli, Institute on Membrane Technology, Italy

Professor Graham A Gagnon, Dalhousie University, Canada

Mr J B Gilbert, Water Transfer Associates, USA

Prof. Dr Rolf Gimbel, University of Duisburg-Essen, Germany

Professor J Gregory, University College London, UK

Professor M Han, Seoul National University, Korea

Professor C Huang, National Chiao Tung University, Taiwan

Professor P M Huck, University of Waterloo, Canada

Mr O Hydes OBE, Independent Drinking Water Consultant, UK

Prof. S Itoh, Kyoto University, Japan

Mr J Jeffery, Durham County Waste Management Ltd, UK

Dr-Ing. habil. K Johannsen, Hamburg University of Technology, Germany

Prof. Dr G Klein, German Aerospace Center, Germany

Professor D F Lawler, University of Texas, USA

Dr Gayle Newcombe, Australian Water Quality Centre, Australia

Professor H Odegaard, Norwegian University of Science and Technology, Norway

Professor S Ohgaki, The University of Tokyo, Japan

Professor S L Ong, National University of Singapore, Singapore

Drs. G Oskam, Provincial Waterworks of Limburg, The Netherlands

Dr S Parsons, Scottish Water, UK

Professor J Qu, Chinese Academy of Sciences (RCEES-CAS), China

Professor Enrique Cabrera Rochera, Polytechnic University of Valencia, Spain

Prof. Dr Ir. J C Schippers, IHE Delft Institute for Water Education, The Netherlands

Prof. Chii Shang, The Hong Kong University of Science and Technology, Hong Kong

Prof. Dr V Snoeyink, University of Illinois, USA

Dr B Stanford, Hazen and Sawyer, P.C., USA

Dr M C Steynberg, Consultant Water Quality, South Africa

Prof. Dr-Ing. Wolfgang Uhl, TU Dresden, Germany

Dr Urs von Gunten, EAWAG, Switzerland

Professor B Wang, Harbin Institute of Technology, China

Prof. Yoshimasa Watanabe, Hokkaido University, Japan

Professor Paul Westerhoff, Arizona State University, USA

The Journal of Water Supply: Research and Technology—AQUA is Indexed/Abstracted in: Georef database, Bibliography and Index of Geology, Geosystems, Environmental Periodicals Bibliography, Chemical Abstract Service, Elsevier Biobase, Aqualine, Engineering Information, Inc.

Aims and Scope

We are beginning a new chapter of the journal's life and with that comes the need to reaffirm our aims for this journal.

The world is facing a tremendous challenge moving into the Age of Sustainability. This has implications for all aspects of water, society and life. The journal publishes peer-reviewed scientific and technical papers suggesting new solutions to providing sustainable water supply. The journal covers research and development in both water technology and management. New opportunities are explored in the area of water supply such as reclaimed water supply, grey water supply, rainwater harvesting, etc.

The journal aims to support water utilities and municipalities transition seamlessly from today to the sustainable water supply of the future. The transition includes exchanging old systems intelligently based on systematic asset management, preparing the new system for the effects of climate change and ensuring a human water supply without compromising ecosystems. To succeed requires an intelligent integration between society and nature looking at land and related resources as well. It requires co-creation processes with all relevant stakeholders including so far underrepresented stakeholders such as women and minorities to ensure social welfare.

The journal's scope includes:

Water sustainability

- Integrated management of water resources (IWRM)
- Water stewardship
- Drivers and barriers for water sustainability
- Designs for seamless interaction between utility and nature
- Water and nature preservation and -restoration
- Applied methods to characterize water quality

Water infrastructure

- Resilient/Sustainable water infrastructure
- Integrating the hydrological cycle in design and operation
- Climate change adaptation
- Water infrastructure design and planning
- Ecological water designs
- Asset management

Water technologies

- Advanced water treatment technologies and processes
- Reclamation and desalination
- Water treatment processes, residuals treatment and management
- Environmentally friendly technologies, circular economy and water re-use
- Modelling of source waters, treatment and distribution systems
- Control and automation
- Monitoring of ecosystem health
- Industry 4.0/Utility 4.0

Water management and governance

- Water system management and policy: Legislation, economics, public relations, crisis management
- Water-energy-ecosystem nexus
- Industrial symbiosis
- Facilitation of collaborative processes with stakeholders
- The social impacts of water systems
- Partnerships for good water governance

Submission

All manuscripts should be submitted electronically through our Online Submission and Peer Review System:

<https://www.editorialmanager.com/jwsrtaqua>. Authors should prepare their papers in accordance with the current *Instructions for Authors*, available at https://iwaponline.com/aqua/pages/Instructions_for_authors or from the Editorial Office at the address given inside the back cover.

US Mail Identification Statement

Journal of Water Supply: Research and Technology—AQUA is published eight times a year in February, March, May, June, August, September, November and December. The annual subscription price for 2020, including postage, is given on the inside back cover. Full details of subscriptions (including electronic access) can be obtained on request from the distribution agents, Turpin Distribution Ltd, at the address given on the inside back cover. IWA Publishing is a company registered in the UK, no. 3690822.

US publishing office: *Journal of Water Supply: Research and Technology—AQUA*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, USA. Periodicals postage paid at Rahway, NJ, USA.

Postmaster: please send address corrections to *Journal of Water Supply Research and Technology—AQUA*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, USA.
