

**Contents**

- 593 Multi-objective operational optimization toward improved resilience in water distribution systems  
**Chao Zhang, Haixing Liu, Shengwei Pei, Mengke Zhao and Huicheng Zhou**
- 608 Fuzzy credibility-constrained quadratic optimization for booster chlorination of the water distribution system under uncertainty  
**Yumin Wang and Guangcan Zhu**
- 628 Combined enhancement of evaporation and condensation rates in the solar still for augmenting the freshwater productivity using energy storage and natural fibres  
**Subbarama Kousik Suraparaju and Sendhil Kumar Natarajan**
- 642 Development of a new comprehensive framework for the evaluation of leak management components and practices  
**Cansu Bozkurt, Mahmut Firat and Abdullah Ateş**
- 664 Economic feasibility analysis of variable-speed pumps by simulating 15 multiple water distribution systems  
**Conrad B. Truettner and Brian D. Barkdoll**
