Voyage without constellation: evaluating the performance of three uncalibrated process-oriented models

Unfortunately an incorrect version of the Acknowledgements section appears on p. 270 of this paper; the correct version is as printed below.

ACKNOWLEDGEMENTS

Funding for this study was provided in part by both the Northeastern States Research Cooperative and a Collaborative Research and Development Grant from the Natural Sciences and Engineering Council (NSERC) and the Cumulative Environmental Management Association (CEMA). This research was also funded, in part, by the Canada Research Chairs Program and an NSERC Discovery Grant. Some data used in this publication were obtained by scientists of the Hubbard Brook Ecosystem Study; this publication has not been reviewed by those scientists. The Hubbard Brook Experimental Forest is operated and maintained by the Northeastern Research Station, US Department of Agriculture, Newtown Square, Pennsylvania. We are indebted to Gene E. Likens for the provision of precipitation data with funding from the National Science Foundation (LTREB and LTER programs) and The Andrew W. Mellon Foundation. We also thank Scott Bailey and Tony Federer for providing soil samples for mineral species analysis and detailed hydrological properties for the Hubbard Brook Experimental Forest.
