Role of Hydrology in Managing Consequences of a Changing Global Environment

Editorial
Littlewood, I. G. and Xu, C.-Y.

Modelling and reconstruction of the River Kennet palaeohydrology and hydrogeology: Silbury Hill and Avebury in 4,400 BP
Whitehead, P. G. and Edmunds, W. M.

The role of groundwater characteristics in catchment recovery from nitrate pollution
Dunn, C. M., Darling, W. G., Birkel, C. and Bacon, J. R.

Reconciling observed and modelled phytoplankton dynamics in a major lowland UK river, the Thames
Lázár, A. N., Wade, A. J., Whitehead, P. G., Neal, C. and Loewenthal, M.

Crisp discharge forecasts and grey uncertainty bands using data-driven models
Alvisi, S., Creaco, E. and Franchini, M.

Self-organising map rainfall-runoff multivariate modeling for runoff reconstruction in inadequately gauged basins
Adeloye, A. I. and Rastum, R.

An appraisal of the performance of data-infilling methods for application to daily mean river flow records in the UK
Harvey, C. L., Dixson, H. and Hanauford, J.

Frequency analysis of extreme rainfall in Cumbria, 16–20 November 2009
Stewart, E. J., Morris, D. G., Jones, D. A. and Gibson, H. S.

Setting design inflows to hydrodynamic flood models using a dependence model
Faulkner, D., Keef, C. and Martin, I.

Building local flood water knowledge into community flood resilience planning after the July 2007 floods, Gloucestershire, UK
McElwee, L. and Jones, O.

Multi-year droughts in Europe: analysis of development and causes
Perry, S., Hanauford, J., Lloyd-Hughes, R. and Prudhomme, C.

Evidence for the onset and persistence with depth of preferential flow in unsaturated fractured porous media
Irons, A. M., Butler, A. B. and Wheaton, H. S.

Simulation of snow and soil water content as a basis for satellite retrievals
Sandell, M. J., Förlöw, G. N., Gurney, B. J. and Marks, D.

A preliminary appraisal of Thurnham dual polarisation radar in the context of hydrological modelling structure
Zhu, D. and Chuckie, I. D.
