

Hydrology Research

An International Journal

Contents

- On an extension of the L-moment approach to modelling distributions which include trend
D. A. Jones 571
- Limited adaptive genetic algorithm for inner-plant economical operation of hydropower station
Jiao Zheng, Kan Yang and Xiuyuan Lu 583
- Field evaluation of a new method for estimation of liquid water content and snow water equivalent of wet snowpacks with GPR
Nils Sundström, David Gustafsson, Andrey Kruglyak and Angela Lundberg 600
- Spatial distribution of PCDDs, PCDFs and dl-PCBs along the cascade of urban reservoirs
Magdalena Urbaniak, Marek Zieliński, Zbigniew Kaczkowski and Maciej Zalewski 614
- Multivariate models for rainfall based on Markov modulated Poisson processes
R. Thayakaran and N. I. Ramesh 631
- The impact of beetle-induced conifer death on stand-scale canopy snow interception
Evan T. Pugh and Eric E. Small 644
- A river stage correction approach using Fourier series
Xiaoqin Zhang and Weimin Bao 658
- On runoff generation and the distribution of storage deficits
A. Wood and K. J. Beven 673
- System dynamics simulation of soil water resources with data support from the Yucheng Comprehensive Experimental Station, North China
Changchun Zhou, Yi Luo and Melanie Zeppel 690
- Evaluation of the FAO Penman–Monteith, Priestley–Taylor and Hargreaves models for estimating reference evapotranspiration in southern Malawi
Cosmo Ngongondo, Chong-Yu Xu, Lena M. Tallaksen and Berhanu Alemaw 706
- Hydrologic sensitivity of the Upper San Joaquin River Watershed in California to climate change scenarios
Zili He, Zhi Wang, C. John Suen and Xiaoyi Ma 723
- Changes in stage–flow relation of the East River, the Pearl River basin: causes and implications
Qiang Zhang, Kun Li, Vijay P. Singh, Xiaohong Chen and Jianfeng Li 737
