

Hydrology Research

An International Journal

Contents

Estimation of daily dew point temperature using genetic programming and neural networks approaches <i>Jalal Shiri, Sungwon Kim and Ozgur Kisi</i>	165
Finite volume method solution of pollutant transport in catchment sheet flow <i>Gokmen Tayfur, Zhiguo He and Qihua Ran</i>	182
Travel time of curved parallel hillslopes <i>Shabnam Noroozpour, Bahram Saghafian, Ali Mohammad Akhondali and Fereydoon Radmanesh</i>	190
Quantifying the differential contributions of deep groundwater to streamflow in nested basins, using both water quality characteristics and water balance <i>M. C. Ockenden, N. A. Chappell and C. Neal</i>	200
Pan evaporation and reference evapotranspiration trend detection in western Iran with consideration of data persistence <i>P. Hosseinzadeh Talaei, Hossein Tabari and Hiram Abghari</i>	213
Evaluation of downscaled daily rainfall hindcasts over Sydney, Australia using statistical and dynamical downscaling approaches <i>R. Mehrotra, J. P. Evans, A. Sharma and B. Sivakumar</i>	226
A principal components/singular spectrum analysis approach to ENSO and PDO influences on rainfall in western Iran <i>Monireh Biabanaki, Seyed Saeid Eslamian, Jahangir Abedi Koupai, Julio Cañón, Giorgio Boni and Mahdi Gheysari</i>	250
Spatial prediction of the runoff coefficient in Southern Peninsular Italy for the index flood estimation <i>G. Del Giudice, R. Padulano and G. Rasulo</i>	263
Comparing urban runoff quality of a felt roof and an asphalt road in Beijing <i>Lizhu Hou and Xin Zhang</i>	282
Assessment of suspended sediment concentration and load from a large Himalayan glacier <i>Manohar Arora, Rakesh Kumar, Naresh Kumar and Jatin Malhotra</i>	292
