

# Hydrology Research

An International Journal

volume 48 | issue 1 | February 2017

## Contents

- 1 Assessing long term flash flooding frequency using historical information  
**David R. Archer, Geoff Parkin and Hayley J. Fowler**
- 17 A new modified nonlinear Muskingum model and its parameter estimation using the adaptive genetic algorithm  
**Song Zhang, Ling Kang, Liwei Zhou and Xiaoming Guo**
- 28 Pre-event water contributions to runoff events of different magnitude in pre-alpine headwaters  
**Benjamin M. C. Fischer, Manfred Stähli and Jan Seibert**
- 48 An experimental approach to reduce the parametric dimensionality for rainfall-runoff models  
**Jie Chen, Richard Arsenault and François P. Brissette**
- 66 Examination of a coupled supply- and demand-induced stress function for root water uptake modeling  
**Na Liu, Huade Guan, Zidong Luo, Cicheng Zhang, Hailong Wang and Xiping Zhang**
- 77 An evaluation framework for identifying the optimal raingauge network based on spatiotemporal variation in quantitative precipitation estimation  
**Che-Hao Chang, Shiang-Jen Wu, Chih-Tsung Hsu, Jhih-Cyuan Shen and Ho-Cheng Lien**
- 99 Assessment of rainfall aggregation and disaggregation using data-driven models and wavelet decomposition  
**Sungwon Kim, Ozgur Kisi, Youngmin Seo, Vijay P. Singh and Chang-Joon Lee**
- 117 Partially penetrating slug tests in an unweathered till layer  
**David W. Ostendorf, William G. Lukas and Don J. DeGroot**
- 133 Application of modified Manning formula in the determination of vertical profile velocity in natural rivers  
**S. Song, B. Schmalz, J. X. Zhang, G. Li and N. Fohrer**
- 147 3D CFD modelling of velocities and sediment transport in the Iffezheim hydropower reservoir  
**G. Hillebrand, I. Klassen and N. R. B. Olsen**

- 160 Identifying the impact of Energy Base Water Project on groundwater using high-frequency monitoring data in the Subei Lake basin, Ordos, Northwestern China  
**Fei Liu, Xianfang Song, Lihu Yang, Dongmei Han, Yinghua Zhang, Ying Ma and Hongmei Bu**
- 177 Groundwater attenuation of summer stream temperatures favors deeper intrusion depths into Lake George, NY  
**Mark W. Swinton, Lawrence W. Eichler, Sandra A. Nierzwicki-Bauer, Jeremy L. Farrell, James W. Sutherland, Michael R. Kelly and Charles W. Boylen**
- 191 A distributed hydrological model in the Heihe River basin and its potential for estimating the required irrigation water  
**Lei Li, Zongxue Xu, Jie Zhao and Longqiang Su**
- 214 Altitudinal variations of temperature, equilibrium line altitude, and accumulation-area ratio in Upper Indus Basin  
**Biswajit Mukhopadhyay and Asif Khan**
- 231 What is the primary factor controlling trend of Glacier No. 1 runoff in the Tianshan Mountains: temperature or precipitation change?  
**Yanlong Kong and Zhonghe Pang**
- 240 Coastal aquifer hydrodynamics and salinity in response to the tide: case study in Lisbon, Portugal  
**M. Mancuso, E. Carol, E. Kruse and F. Mendes Rodrigues**
- 253 The multi-time-scale correlations for drought–flood index to runoff and North Atlantic Oscillation in the headstreams of Tarim River, Xinjiang, China  
**Hongbo Ling, Xiaoya Deng, Aihua Long and Haifeng Gao**
- 265 Temporal and spatial analysis of meteorological drought characteristics in the upper Blue Nile river region  
**Mosaad Khadr**
- 277 Historic record of pasture soil water and the influence of the North Atlantic Oscillation in south-west England  
**Anita Shepherd, Wellen Atuhaire, Lianhai Wu, David Hogan, Robert Dunn and Laura Cardenas**
- 295 Variations in the precipitation–runoff relationship of the Weihe River Basin  
**Aijun Guo, Jianxia Chang, Dengfeng Liu, Yimin Wang, Qiang Huang and Yunyun Li**
