

Hydrology Research

An International Journal

volume 48 | issue 4 | August 2017

Contents

Challenges of milder winters to northern hydrology

- 883 Editorial: Challenges of milder winters to northern hydrology
Esko Kuusisto
- 884 Measuring winter precipitation and snow on the ground in northern polar regions
J. R. Janowicz, S. L. Stuefer, K. Sand and L. Leppänen
- 902 A new GIS landscape classification method for rain/snow temperature thresholds in surface based models
James M. Feiccabrino and Laurie D. Grigg
- 915 Spatial and temporal characteristics in streamflow-related hydroclimatic variables over western Canada.
Part 1: 1950–2010
H. C. L. O’Neil, T. D. Prowse, B. R. Bonsal and Y. B. Dibike
- 932 Spatial and temporal characteristics in streamflow-related hydroclimatic variables over western Canada.
Part 2: future projections
H. C. L. O’Neil, T. D. Prowse, B. R. Bonsal and Y. B. Dibike
- 945 Hydro-climatic drivers of mid-winter break-up of river ice in western Canada and Alaska
B. W. Newton, T. D. Prowse and L. P. de Rham
- 957 Analysis of water balance and runoff generation in high latitude agricultural fields during mild and cold winters
H. Koivusalo, M. Turunen, H. Salo, K. Haahti, R. Nousiainen and L. Warsta
- 969 The heat budget of Lake Kilpisjärvi in the Arctic tundra
Matti Leppäranta, Elisa Lindgren and Kunio Shirasawa

Research Papers

- 981 Modeling streamflow from coupled airborne laser scanning and acoustic Doppler current profiler data
Norris Lam, Jason W. Kean and Steve W. Lyon
- 997 Bivariate design flood quantile selection using copulas
Tianyuan Li, Shenglian Guo, Zhangjun Liu, Lihua Xiong and Jiabo Yin

British
Hydrological
Society

Società Idrologica Italiana
Italian Hydrological Society

Deutsche
Hydrologische
Gesellschaft

- 1014 Exploration of sub-annual calibration schemes of hydrological models
Kue Bum Kim and Dawei Han
- 1032 Assessment of different methods for estimation of missing data in precipitation studies
Mohammad-Taghi Sattari, Ali Rezazadeh-Joudi and Andrew Kusiak
- 1045 Assessing interactions between groundwater and surface water in a Pampean stream
F. Becher Quinodoz, M. Blarasin, H. Panarello and E. Ducos
- 1058 Haihe River discharge to Bohai Bay, North China: trends, climate, and human activities
Qi Wei, Conghui Sun, Guanghong Wu and Ling Pan
- 1071 Influence of a dual monsoon system and two sources of groundwater recharge on Kofu basin alluvial fans, Japan
Takashi Nakamura, Kei Nishida and Futaba Kazama
- 1088 DRASTIC assessment of groundwater vulnerability to pollution in the Vistula floodplain in central Poland
Ewa Krogulec and Joanna Trzeciak
- 1100 Analysis of interactive effects of DEM resolution and basin subdivision level on runoff simulation in Kaidu River Basin, China
J. Sun, Y. P. Li, G. H. Huang and C. X. Wang
- 1118 The significance of spatial variability of rainfall on simulated runoff: an evaluation based on the Upper Lee catchment, UK
I. G. Pechlivanidis, N. McIntyre and H. S. Wheeler
- 1131 Actual daily evapotranspiration and crop coefficients for an alpine meadow in the Qilian Mountains, northwest China
Yong Yang, Rensheng Chen, Yaoxuan Song, Chuntan Han, Jiufeng Liu and Zhangwen Liu
- 1143 Attribution of changes in stream flow to land use change and climate change in a mesoscale tropical catchment in Java, Indonesia
Hero Marhaento, Martijn J. Booij and Arjen Y. Hoekstra
- 1156 Estimation of maize evapotranspiration using extreme learning machine and generalized regression neural network on the China Loess Plateau
Yu Feng, Daozhi Gong, Xurong Mei and Ningbo Cui
