Contents

1455 Hydrological model parameterization using NDVI values to account for the effects of land cover change on the rainfall–runoff response
Vahid Nourani, Ahmad Fakheri Fard, Hoshin V. Gupta, David C. Goodrich and Faegheh Niazi

1474 Estimating instantaneous peak flow from mean daily flow
Bo Chen, Witold F. Krajewski, Fan Liu, Weihua Fang and Zongxue Xu

1489 Modelling of runoff and sediment yield using ANN, LS-SVR, REPTree and M5 models
Birendra Bharti, Ashish Pandey, S. K. Tripathi and Dheeraj Kumar

1508 Groundwater quality modeling using neuro-particle swarm optimization and neuro-differential evolution techniques
Ozgur Kisi, Ali Keshavarzi, Jalal Shiri, Mohammad Zounemat-Kermani and El-Sayed Ewis Omran

1520 Performance of two prevalent infiltration models for disturbed urban soils
Xixi Wang, David J. Sample, Shohreh Pedram and Xiao Zhao

1537 Two-dimension coupling model to simulate water flow, sediment transport and bed evolution
Wei Liu, Siming He and Qiang Xu

1554 Inference of basin flood potential using nonlinear hysteresis effect of basin water storage: case study of the Koshi basin
Pennan Chinnasamy

1566 When should stream water be sampled to be most informative for event-based, multi-criteria model calibration?
L. Wang, H. J. van Meerveld and J. Seibert

1585 Natural vs. anthropogenic effects in the composition of dissolved inorganic carbon in a boreal river with a seasonal base flow component
Paula I. A. Niinikoski and Juha A. Karhu

1594 Impact of calculation method, sampling frequency and hysteresis on suspended solids and total phosphorus load estimations in cold climate
Pasi Valkama and Olli Ruth
1611 Differential intra-specific stemflow funnelling efficiencies of *Caragana korshinskii* within arid desert ecosystems
Ya-feng Zhang, Xin-ping Wang, Rui Hu and Yan-xia Pan

1624 A depth–duration–frequency analysis for short-duration rainfall events in England and Wales
Ilaria Prosdocimi, Elizabeth J. Stewart and Gianni Vesuviano

1639 Hydrometric network design using dual entropy multi-objective optimization in the Ottawa River Basin
Connor Werstuck and Paulin Coulibaly

1652 Applicability of a physically based soil water model (SWMOD) in design flood estimation in eastern Australia
Melanie Loveridge, Ataur Rahman and Peter Hill

1666 Meltwater flow through a rapidly deglaciating glacier and foreland catchment system: Virkisjökull, SE Iceland
Verity Flett, Louise Maurice, Andrew Finlayson, Andrew R. Black, Alan M. MacDonald, Jez Everest and Martin P. Kirkbride

1682 The role of surface storage of brackish marshes in the southern area of the Baltic Sea (northern Poland)
Roman Cieśliński and Joanna Jokiel

1697 Comparison of West Balkan adult trout habitat predictions using a Pseudo-2D and a 2D hydrodynamic model
Christina Papadaki, Vasilis Bellos, Lazaros Ntoanidis and Elias Dimitriou

1710 Wavelet analysis–artificial neural network conjunction models for multi-scale monthly groundwater level predicting in an arid inland river basin, northwestern China
Xiaohu Wen, Qi Feng, Ravinesh C. Deo, Min Wu and Jianhua Si

1730 Evaluation of hydrological response to extreme climate variability using SWAT model: application to the Fuhe basin of Poyang Lake watershed, China
Jianzhong Lu, Xiaolin Cui, Xiaoling Chen, Sabine Sauvage and José-Miguel Sanchez Perez

1745 Baseflow recession characterization and groundwater storage trends in northern Taiwan
Kun-Ta Lin and Hsin-Fu Yeh

1757 Evaluating the impact of grid cell properties in spatial discretization of groundwater model for a tropical karst catchment in Rote Island, Indonesia
Dua K. S. Y. Klaas, Monzur Alam Imteaz and Arul Arulrajah
