Contents

1 Conjunction of wavelet-entropy and SOM clustering for multi-GCM statistical downscaling
   Aida Hosseini Baghanam, Vahid Nourani, Mohammad-Ali Keynejad, Hassan Taghipour and
   Mohammad-Taghi Alami

24 Assessing runoff sensitivities to precipitation and temperature changes under global climate-change
   scenarios
   Lei Chen, Jianxia Chang, Yimin Wang and Yuelu Zhu

43 Estimation of suspended sediment and dissolved solid load in a Mediterranean semiarid karst stream
   using log-linear models
   Alberto Martínez-Salvador and Carmelo Conesa-García

60 How does a rubber plantation affect the spatial variability and temporal stability of throughfall?
   Jiaqing Liu, Wenjie Liu, Weixia Li and Huanhuan Zeng

75 Data mining based on wavelet and decision tree for rainfall-runoff simulation
   Vahid Nourani, Ali Davanlou Tajbakhsh and Amir Molajou

85 Modelling soil detachment capacity by rill flow with hydraulic variables on a simulated steep loessial
   hillslope
   Nan Shen, Zhanli Wang, Qingwei Zhang, Hao Chen and Bing Wu

99 Development of WEP-COR model to simulate land surface water and energy budgets in a cold region
   Jia Li, Zuhao Zhou, Hao Wang, Jiajia Liu, Yangwen Jia, Peng Hu and Chong-Yu Xu

117 Projection of hydro-climatological changes over eastern Himalayan catchment by the evaluation of
   RegCM4 RCM and CMIP5 GCM models
   Vishal Singh, Ashutosh Sharma and Manish Kumar Goyal

138 An urban pluvial flood simulation model based on diffusive wave approximation of shallow water
   equations
   Boni Su, Hong Huang and Wei Zhu

155 Using time compression approximation to determine actual infiltration rate from variable rainfall events
   Yanyan Cheng, Guotao Cui and Jianting Zhu
