

Hydrology Research

An International Journal

volume 50 | issue 1 | February 2019

Contents

- 1 Conjunction of wavelet-entropy and SOM clustering for multi-GCM statistical downscaling
Aida Hosseini Baghanam, Vahid Nourani, Mohammad-Ali Keynejad, Hassan Taghipour and Mohammad-Taghi Alami
- 24 Assessing runoff sensitivities to precipitation and temperature changes under global climate-change scenarios
Lei Chen, Jianxia Chang, Yimin Wang and Yuelu Zhu
- 43 Estimation of suspended sediment and dissolved solid load in a Mediterranean semiarid karst stream using log-linear models
Alberto Martínez-Salvador and Carmelo Conesa-García
- 60 How does a rubber plantation affect the spatial variability and temporal stability of throughfall?
Jiaqing Liu, Wenjie Liu, Weixia Li and Huanhuan Zeng
- 75 Data mining based on wavelet and decision tree for rainfall-runoff simulation
Vahid Nourani, Ali Davanlou Tajbakhsh and Amir Molajou
- 85 Modelling soil detachment capacity by rill flow with hydraulic variables on a simulated steep loessial hillslope
Nan Shen, Zhanli Wang, Qingwei Zhang, Hao Chen and Bing Wu
- 99 Development of WEP-COR model to simulate land surface water and energy budgets in a cold region
Jia Li, Zuhao Zhou, Hao Wang, Jiajia Liu, Yangwen Jia, Peng Hu and Chong-Yu Xu
- 117 Projection of hydro-climatological changes over eastern Himalayan catchment by the evaluation of RegCM4 RCM and CMIP5 GCM models
Vishal Singh, Ashutosh Sharma and Manish Kumar Goyal
- 138 An urban pluvial flood simulation model based on diffusive wave approximation of shallow water equations
Boni Su, Hong Huang and Wei Zhu
- 155 Using time compression approximation to determine actual infiltration rate from variable rainfall events
Yanyan Cheng, Guotao Cui and Jianting Zhu

British
Hydrological
Society

Societ  Idrologica Italiana
Italian Hydrological Society

Deutsche
Hydrologische
Gesellschaft

- 166 Inter-comparison between retrospective ensemble streamflow forecasts using meteorological inputs from ECMWF and NOAA/ESRL in the Hudson River sub-basins during Hurricane Irene (2011)
F. Saleh, V. Ramaswamy, N. Georgas, A. F. Blumberg and J. Pullen
- 187 Estimating reference crop evapotranspiration with elevation based on an improved HS model
Pengcheng Tang, Bing Xu, Zhanyi Gao, Heping Li, Xiaoyu Gao and Chaozi Wang
- 200 Seasonal streamflow forecasts using mixture-kernel GPR and advanced methods of input variable selection
Shuang Zhu, Xiangang Luo, Zhanya Xu and Lei Ye
- 215 Variability of spatial patterns of autocorrelation and heterogeneity embedded in precipitation
Dedi Liu, Qin Zhao, Shenglian Guo, Pan Liu, Lihua Xiong, Xixuan Yu, Hui Zou, Yujie Zeng and Zhaoli Wang
- 231 Multi-index data dimension reduction approach and its applicability in the calculation of indicators of hydrological alteration
Wenhai Zhang, Yangwen Jia, Jinjin Ge, Xiaorong Huang, Guangheng Ni, Jiaming Hou and Hao Wang
- 244 Spatiotemporal impacts of land use land cover changes on hydrology from the mechanism perspective using SWAT model with time-varying parameters
Yunyun Li, Jianxia Chang, Lifeng Luo, Yimin Wang, Aijun Guo, Feng Ma and Jingjing Fan
- 262 Assessing the predictability of MLR models for long-term streamflow using lagged climate indices as predictors: a case study of NSW (Australia)
Rijwana I. Esha and Monzur A. Imteaz
- 282 Global comparison of 20 reference evapotranspiration equations in a semi-arid region of Iran
Hadi Farzanpour, Jalal Shiri, Ali Ashraf Sadraddini and Slavisa Trajkovic
- 301 Comparative analysis of meteorological and hydrological drought over the Pearl River basin in southern China
Kai Xu, Guangxiong Qin, Jie Niu, Chuanhao Wu, Bill X. Hu, Guoru Huang and Peng Wang
- 319 Groundwater vulnerability assessment using GIS-based DRASTIC method in the irrigated and coastal region of Sindh province, Pakistan
Asfandyar Shahab, Qi Shihua, Saeed Rad, Souleymane Keita, Majid Khan and Syed Adnan
- 339 Modelling the frequency distribution of inter-arrival times from daily precipitation time-series in North-West Italy
Giorgio Baiamonte, Luca Mercalli, Daniele Cat Berro, Carmelo Agnese and Stefano Ferraris
- 358 Hydrological responses and adaptive potential of cascaded reservoirs under climate change in Yuan River Basin
Yuxue Guo, Guohua Fang, Xin Wen, Xiaohui Lei, Yu Yuan and Xiaoying Fu

- 379 Flood mapping in small ungauged basins: a comparison of different approaches for two case studies in Slovakia
Andrea Petroselli, Matej Vojtek and Jana Vojteková
- 393 The probabilistic drought prediction using the improved surface water supply index in the Korean peninsula
Suk Hwan Jang, Jae-Kyoung Lee, Ji Hwan Oh, Jun Won Jo and Younghyun Cho
- 416 Corrigendum to 'A multiscale time-space approach to analyze and categorize the precipitation fluctuation based on the wavelet transform and information theory concept' [Hydrology Research 49 (3), 724–743. <https://doi.org/10.2166/nh.2018.143>]
Kiyoumars Roushangar, Vahid Nourani and Farhad Alizadeh
