Contents

809 Stage-discharge estimation in compound open channels with composite roughness
  Amirreza Kavousizadeh, Mahmoud F. Maghrebi and Arash Ahmadi

825 Hydraulic scale modelling of the rating curve for a gauging station with challenging geometry
  Øyvind Pedersen, Jochen Aberle and Nils Rüther

837 Dynamic response of runoff to soil and water conservation measures and precipitation based on
  VAR model
  Juan Zhao, Xingmin Mu and Peng Gao

849 An improved source apportionment mixing model combined with a Bayesian approach for nonpoint
  source pollution load estimation
  Zhongyue Yan, Jing Xu and Xiaohong Ruan

861 Parameter sensitivity analysis of SWAT model for streamflow simulation with multisource precipitation
  datasets
  Jing Guo and Xiaoling Su

878 Contribution of flow conditions and sand addition on hyporheic zone exchange in gravel beds
  H. Marttila, S. Tammela, K.-R. Mustonen, P. Louhi, T. Muotka, H. Mykrä and B. Kløve

886 Development of load duration curve system in data-scarce watersheds based on a distributed hydrological
  model
  Jia Wang, Xin-hua Zhang, Chong-Yu Xu, Hao Wang, Xiao-hui Lei, Xu Wang and Si-yu Li

901 Using integrated meteorological and hydrological indices to assess drought characteristics in southern
  Taiwan
  Hsin-Fu Yeh

915 Evaluation of an instantaneous dryness index-based calibration-free continuous hydrological model
  in India
  Swagat Patnaik, Vimal Chandra Sharma and Basudev Biswal
Response of soil water hydrochemistry and $\delta^{13}$C$_{\text{DIC}}$ to changes in spatio-temporal variations under different land covers in SW China karst catchment

Peng Wang, Licheng Shen, Xiaohong Chen, Zhijun Wang, Xuan Liang, Bill X. Hu, Jiacheng Lan and Xinxin Zhai

Short-duration rainfall extremes in Sweden: a regional analysis

Jonas Olsson, Johan Södling, Peter Berg, Lennart Wern and Anna Eronn

Towards sustainable water regulation based on a distributed hydrological model for a heavily polluted urban river, northwest China

Jiqiang Lyu, Pingping Luo, Shuhong Mo, Meimei Zhou, Bing Shen, Lei Fan and Daniel Nover

Geochemical controls on the distribution of radio-trace elements in groundwater resources of Shir-Kuh granitoid aquifer, central Iran

Bahareh Yazdizadeh, Hadi Jafari and Rahim Bagheri
