## Published in partnership with: Nordic Association for Hydrology

Nordic Association for Hydrology (NHF) is an independent body aiming at promoting hydrology as a science, increasing the understanding of hydrology, and enhancing the application of hydrological methods within applied sciences and water management,

generally and in the North. The Association strongly supports international hydrological co-operation. More information is available at <http://www.nhf-hydrology.org/>

## British Hydrological Society

British  
Hydrological  
Society

The British Hydrological Society (BHS) was formed in 1983 in response to a clear need in the UK for a new, broad-based, national

society for the advancement of hydrology. The Society caters for all those with an interest in the inter-disciplinary subject of hydrology. It aims to promote interest and scholarship in scientific and applied aspects of hydrology, and to foster the involvement of its members in national and international activities.
