Contents

1  Cause analysis for a new type of devastating flash flood
   Jingming Hou, Bingyao Li, Yu Tong, Liping Ma, James Ball, Hui Luo, Qiuhua Liang and Junqiang Xia

17 The applicability of real-time flood forecasting correction techniques coupled with the Muskingum method
   Ruixiang Yang, Baodeng Hou, Weihua Xiao, Chuan Liang, Xuelei Zhang, Baoqi Li and Haiying Yu

30 Exploration on hydrological model calibration by considering the hydro-meteorological variability
   Binru Zhao, Jingqiao Mao, Qiang Dai, Dawei Han, Huichao Dai and Guiwen Rong

47 Predictive models for stemflow and throughfall estimation in four fruit tree species under hot and
   sub-humid climatic region

65 Logarithmic transformation and peak-discharge power-law analysis
   Bo Chen, Chunying Ma, Witold F. Krajewski, Pei Wang and Feipeng Ren

77 Integrated framework for assessing climate change impact on extreme rainfall and the urban drainage
   system
   Wei Lu and Xiaosheng Qin

90 Pumping optimization of coastal aquifers using probabilistic search – case study: Quaternary aquifer of
   El-Arish Rafah, Egypt
   Hamdy A. El-Ghandour and Emad Elbeltagi

105 Evaluation of bias-adjusted satellite precipitation estimations for extreme flood events in Langat river
   basin, Malaysia

127 Urban flood risk mapping using data-driven geospatial techniques for a flood-prone case area in Iran
   Hamid Darabi, Ali Torabi Haghighi, Mohamad Ayob Mohamadi, Mostafa Rashidpour, Alan D. Ziegler, Ali Akbar Hekmatzadeh and Bjørn Kløve
