Advances in Water Science Research

975 Identification and characteristics analysis of Meiyu in Anhui Province based on the National Standard of Meiyu monitoring indices
Yuliang Zhou, Yilin Zuo, Yuliang Zhang, Juliang Jin, Ping Zhou, Chengguo Wu, Yi Cui and Shaowei Ning

990 Temporary dependency of parameter sensitivity for different flood types
Suli Pan, Yue-Ping Xu, Haiting Gu, Zhi Xu Bai and Weidong Xuan

1015 Detecting the dominant contributions of runoff variance across the source region of the Yellow River using a new decomposition framework
Jingkai Xie, Yue-Ping Xu, Yuxue Guo and Yitong Wang

1033 Identifying dominant component of runoff yield processes: a case study in a sub-basin of the middle Yellow River
Li Zhang, Caihong Hu, Shengqi Jian, Qiang Wu, Guang Ran and Yuanhao Xu

1048 Accuracy assessment and error cause analysis of GPM (V06) in Xiangjiang river catchment
Bingru Tian, Hua Chen, Jialing Wang and Chong-Yu Xu

1066 A novel remote sensing method to determine reservoir characteristic curves using high-resolution data
Tiesheng Guan, Qin Xu, Xing Chen and Jing Cai

1083 On the runoff validation of ‘Global BROOK90’ automatic modeling framework
Ivan Vorobevskii, Rico Kronenberg and Christian Bernhofer

1100 A statistical approach for reconstructing natural streamflow series based on streamflow variation identification
Chiheng Dang, Hongbo Zhang, Vijay P. Singh, Tong Zhi, Jingru Zhang and Hao Ding
1116 Soil salinization affected by hydrogeochemical processes of shallow groundwater in Cangzhou City, a coastal region in North China
   Jin He, Qijun Den, Xuejun Ma, Xiaosi Su and Xuemei Ma

1132 The relationship between typical heavy metal content and physiological indexes of shrubs in bioretention facilities
   Yongwei Gong, Zhihua Zhou, Baolin Xue, Xiyan Ren, Yan Hao and Junqi Li

1143 Evaluating the influence of hydrological condition on the phosphorus loads in an agricultural river basin using the SWAT model
   Jian Cui, Yue Zhao, Wenchao Sun, Yan Chen, Bo Wu, Baolin Xue, Haiyang Chen, Zhanjie Li and Zaifeng Tian

1159 A collaborated framework to improve hydrologic ecosystem services management with sparse data in a semi-arid basin
   Yifan Wu, Yang Xu, Guodong Yin, Xuan Zhang, Chong Li, Liyu Wu, Xiao Wang, Quihong Hu and Fanghua Hao
