Contents

1173 A new Xin’anjiang and Sacramento combined rainfall-runoff model and its application
Maolin Zhang, Jinwen Wang, Yanxuan Huang, Lili Yu, Shuangquan Liu and Gaoquan Ma

1184 Identifying critical source areas of nonpoint source pollution in a watershed with SWAT–ECM and AHP methods
Qiang Wu and Hui Yu

1200 Local climate change projections and impact on the surface hydrology in the Vea catchment, West Africa
Isaac Larbi, Fabien C. C. Hountondji, Sam-Quarcoo Dotse, Daouda Mama, Clement Nyamekye, Oluwafemi E. Adeyeri, H. Djan’na Koubodana, Peter Rock Ebo Odoom and Yaw Mensah Asare

1216 Comparison between two generalized Nash models with a same non-zero initial condition
Baowei Yan, Yu Liu, Zhengkun Li and Huining Jiang

1223 Large broad-leaved canopy of banana (Musa nana Lour.) induces dramatically high spatial–temporal variability of throughfall
Wanjun Zhang, Xiai Zhu, Chunfeng Chen, Huanhuan Zeng, Xiaojin Jiang, Junen Wu, Xin Zou, Bin Yang and Wenjie Liu

1239 Improving real-time operational streamflow simulations using discharge data to update state variables of a distributed hydrological model
Francesco Silvestro, Giulia Ercolani, Simone Gabellani, Pietro Giordano and Marco Falzacappa

1261 Simulation of the ice thickness of the Heilongjiang River and application of SD models to a river ice model
Ruofei Xing, Qin Ju, Slobodan P. Simonovic, Zhenchun Hao, Feifei Yuan and Huanghe Gu

1280 Responses of groundwater to precipitation variability and ENSO in the Vietnamese Mekong Delta
Phong V. V. Le, Hai V. Pham, Luyen K. Bui, Anh N. Tran, Chien V. Pham, Giang V. Nguyen and Phuong A. Tran

1294 Flood routing via a copula-based approach
Mohammad Nazeri Tahroudi, Yousef Ramezani, Carlo De Michele and Rasoul Mirabbasi
1309 A practical methodology to perform global sensitivity analysis for 2D hydrodynamic computationally intensive simulations
Saba Mirza Alipour, Kolbjørn Engeland and Joao Leal

1328 Evaluation of satellite-based precipitation products from GPM IMERG and GSMaP over the three-river headwaters region, China
Hua Wang, Yixian Yuan, Siukang Zeng, Wuyan Li and Xiaobo Tang

1344 Rainfall spatial variability in the application of Catchment Morphing for ungauged catchments
Jun Zhang, Dawei Han and Qiang Dai

1357 Sampling uncertainty of UK design flood estimation
Anthony Hammond

1372 Water table variations on different land use units in a drained tropical peatland island of Indonesia
Ismail Ismail, Ali Torabi Haghighi, Hannu Marttila, Uun Kurniawan, Oka Karyanto and Bjørn Kløve

1389 Multi-station calibration strategy for evaluation and sensitivity analysis of the snowmelt runoff model using MODIS satellite images
Vahid Nourani, Amin Afkhaminia, Soghra Andaryani and Yongqiang Zhang

1405 A parsimonious post-processor for uncertainty evaluation of ensemble precipitation forecasts: an application to quantitative precipitation forecasts for civil protection purposes
Daniela Biondi, Ezio Todini and Angela Corina

1423 Assessment of surface waters and pollution impacts in Southern Ghana
Enoch Bessah, Abdulganiy O. Raji, Olalekan J. Taiwo, Sampson K. Agodzo, Olusola O. Ololade, Alexandre Strapasson and Emmanuel Donkor

1436 A novel hybrid XAI-LSTM model for multi-step-ahead flood forecasting
Zhen Cui, Yanlai Zhou, Shenglian Guo, Jun Wang, Huanhuan Ba and Shaokun He

1455 Application of temporal convolutional network for flood forecasting
Yuanhao Xu, Caihong Hu, Qiang Wu, Zhichao Li, Shengqi Jian and Youqian Chen

1469 Hybrid point and interval prediction approaches for drought modeling using ground-based and remote sensing data
Klyoumars Roushangar, Roghayeh Ghasempour, V. S. Ozgur Kirca and Mehmet Cüneyd Demirel

1490 Stochastic modeling of artificial neural networks for real-time hydrological forecasts based on uncertainties in transfer functions and ANN weights
Shiang-Jen Wu, Chih-Tsung Hsu and Che-Hao Chang

1526 Application of red edge band in remote sensing extraction of surface water body: a case study based on GF-6 WFV data in arid area
Zhao Lu, Daqing Wang, Zhengdong Deng, Yue Shi, Zhibin Ding, Hao Ning, Hongfei Zhao, Jiazheng Zhao, Haoli Xu and Xiaoning Zhao
1542 Hydrology under change: long-term annual and seasonal changes in small agricultural catchments in Norway
   Hannah Wenng, Danny Croghan, Marianne Bechmann and Hannu Marttila

1559 Decline in net primary productivity caused by severe droughts: evidence from the Pearl River basin in China
   Yuliang Zhou and Ping Zhou

1577 Copula-based modeling of hydraulic structures using a nonlinear reservoir model
   Qiaofeng Tan, Yunze Mao, Xin Wen, Tian Jin, Ziyu Ding and Zhenni Wang

1596 Design flood estimation with varying record lengths in Norway under stationarity and nonstationarity scenarios
   Lei Yan, Lihua Xiong, Gusong Ruan, Mengjie Zhang and Chong-Yu Xu

1615 Quantitative accuracy assessment of the revised sparse Gash model using distinct time-step climatic parameters
   Yiran Li, Chuanjie Zhang and Yong Niu

1633 Seasonal effects of controlled drainage on field water balance and groundwater levels
   Heidi Salo, Aleksi Salla and Harri Koivusalo
