Contents

1 Application of Z-numbers to teleconnection modeling between monthly precipitation and large scale sea
surface temperature
Hessam Najafi, Vahid Nourani, Elnaz Sharghi, Kiyomars Roushangar and Dominika Dąbrowska

14 Controlled drainage under two climate change scenarios in a flat high-latitude field
Aleksi Salla, Heidi Salo and Harri Koivusalo

29 Will the arid and semi-arid regions of Northwest China become warmer and wetter based on CMIP6
models?
Liu Yang, Jiaxi Tian, Yuanhai Fu, Bin Zhu, Xu He, Mingkun Gao, Michael Tetteh Odamtten, Rui Kong
and Zengxin Zhang

51 A hydrological model skill score and revised R-squared
Charles Onyutha

65 Research and application of parameter estimation method in hydrological model based on dual ensemble
Kalman filter
Mengtian Lu, Sicheng Lu, Weihong Liao, Xiaohui Lei, Zhaokai Yin and Hao Wang

85 Assessment of gridded precipitation products in the hydrological modeling
of a flood-prone mesoscale basin
Salman Khan, Farhan Khan and Yiqing Guan

107 Prediction of flood quantiles at ungauged catchments for the contiguous USA using Artificial Neural
Networks
Valeriya Filipova, Anthony Hammond, David Leedal and Rob Lamb

124 Impact of variability in the hydrological cycle components on vegetation growth in an alpine basin of the
southeastern Tibet Plateau, China
Chunguang Ban, Zongxue Xu, Depeng Zuo, Rui Zhang, Hao Chen, Chenlei Ye, Jing Wang and
Da Waciren

141 Hydro-environmental response to the inter-basin water resource development in the middle and lower
Han River, China
Junhong Zhang, Liquan Guo, Tao Huang, Dongdong Zhang, Zhimin Deng, Linshuang Liu and Tao Yan
156 Spatial–temporal characteristics and driving factors of flash floods in Shaanxi Province considering regional differentiation
   Han Zhang, Jiumang Luo, Jingyan Wu and Mengjie Yu

175 Analysis of spatiotemporal variations of drought and its correlations with remote sensing-based indices via wavelet analysis and clustering methods
   Roghayeh Ghasempour, Kiyounars Roushangar, V. S. Ozgur Kirca and Mehmet Cüneyd Demirel

193 Propagation dynamics and causes of hydrological drought in response to meteorological drought at seasonal timescales
   Lan Ma, Qiang Huang, Shengzhi Huang, Dengfeng Liu, Guoyong Leng, Lu Wang and Pei Li

206 Evaluation of a multisite weather generator on precipitation simulation in the Yangtze River basin
   Yu Li, Xin-Min Zeng and Jiali Guo

221 Estimation of probable maximum precipitation of a high-mountain basin in a changing climate
   Tian Liu, Binquan Li, Luyi Jin, Shiwu Wang, Jinhua Wen and Helong Wang

241 A new method for dividing flood period in the variable-parameter Muskingum models
   Reyhaneh Akbari and Masoud-Reza Hessami-Kermani
