Aims and Scope

It is the principal aim of the Journal to conform to the highest
possible scientific and technical standards.

Hydrology Research publishes articles within hydrology in its
widest sense, with an emphasis on water quantity and quality
aspects of the hydrological cycle. Papers that draw upon
adjoining sciences are embraced as well.

Hydrology Research is intended to be a link between basic
hydrological research and practical application of scientific
results within the broad field of water management.

Submission

All manuscripts should be submitted electronically
through our Online Submission and Peer Review System:

<http://www.editorialmanager.com/hydrology>. Authors

should prepare their papers in accordance with the

current *Instructions for Authors*, available at

https://iwaponline.com/hr/pages/Instructions_for_authors or

from the Editorial Office at the address given inside

the back cover.

Published in partnership with: Nordic Association for Hydrology

Nordic Association for Hydrology (NHF) is an
independent body aiming at promoting
hydrology as a science, increasing the
understanding of hydrology, and enhancing
the application of hydrological methods within
applied sciences and water management,
generally and in the North. The Association strongly supports
international hydrological co-operation. More information is
