Contents

113 Development of pipe deterioration models for water distribution systems using EPR
   L. Berardi, O. Giustolisi, Z. Kapelan and D. A. Savic

127 A hybrid neural networks and numerical models approach for predicting groundwater
   abstraction impacts
   S. J. Birkinshaw, G. Parkin and Z. Rao

139 Development of a simulation–optimization model for multiphase systems in the subsurface:
   a challenge to real-world simulation–optimization
   Kenichiro Kobayashi, Reinhard Hinkelmann and Rainer Helmig

153 Parameter stability and consistency in an alongshore-current model determined with Markov chain
   Monte Carlo
   B. G. Ruessink

163 Single-reservoir operating rules for a year using multiobjective genetic algorithm
   Taesoon Kim, Jun-Haeng Heo, Deg-Hyo Bae and Jin-Hoon Kim

181 Identification of the best hidden layer size for three-layered neural net in predicting monsoon
   rainfall in India
   Surajit Chattopadhyay and Goutami Chattopadhyay
