

# Journal of Hydroinformatics

Official Journal of the IAHR–IWA–IAHS Joint Committee on Hydroinformatics

volume 13 | issue 3 | July 2011

## Advances in urban water systems: operation, management and planning

Guest Editors: Joby Boxall and Zoran Kapelan

- 295 An artificial intelligence approach for optimizing pumping in sewer systems  
**S. Ostojin, S. R. Mounce and J. B. Boxall**
- 307 Improved real-time data anomaly detection using context classification  
**Nemanja Branislavljević, Zoran Kapelan and Dušan Prodanović**
- 324 Combined bulk and wall reactions in turbulent pipe flow: decay coefficients and concentration profiles  
**Kaveh Sookhak Lari, Maarten van Reeuwijk, Ćedo Maksimović and Suzan Sharifan**
- 334 Transient tests for locating and sizing illegal branches in pipe systems  
**S. Meniconi, B. Brunone, M. Ferrante and C. Massari**
- 346 Life-cycle assessment of common water main materials in water distribution networks  
**L. M. Herstein and Y. R. Filion**
- 358 Analysis of the impact of intermittent distribution by modelling the network-filling process  
**M. De Marchis, C. M. Fontanazza, G. Freni, G. La Loggia, E. Napoli and V. Notaro**
- 374 Mathematical modelling of a hydraulic controller for PRV flow modulation  
**Hossam AbdelMeguid, Piotr Skworcow and Bogumil Ulanicki**
- 390 Water quality comprehensive evaluation method for large water distribution network based on clustering analysis  
**Kui Chang, Jin Liang Gao, Wen Yan Wu and Yi Xing Yuan**

## Research Papers

- 401 Some explicit formulations of Colebrook–White friction factor considering accuracy vs. computational speed  
**O. Giustolisi, L. Berardi and T. M. Walski**
- 419 Application of genetic programming to modeling pipe failures in water distribution systems  
**Qiang Xu, Qiuwen Chen and Weifeng Li**
- 429 The search for orthogonal hydrological modelling metrics: a case study of 20 monitoring stations in Colombia  
**E. Domínguez, C. W. Dawson, A. Ramírez and R. J. Abrahart**

- 443 A framework for accurate geospatial modeling using image ranking and machine learning  
**Peter Bajcsy, Yu-Feng Lin, Alex Yahja and Chulyun Kim**
- 461 Comparing the capability of distributed and lumped hydrologic models for analyzing the effects of land use change  
**Murari Paudel, E. James Nelson, Charles W. Downer and Rollin Hotchkiss**
- 474 Flow modeling and analysis of compound channel in river network with complex floodplains and groynes  
**Hassan Ahmed, Norio Tanaka and Nobuyuki Tamai**
- 489 Application of classification trees to determine biological and chemical indicators for river assessment: case study in the Chaguana watershed (Ecuador)  
**L. Dominguez-Granda, K. Lock and P. L. M. Goethals**
- 500 A new wavelet-bootstrap-ANN hybrid model for daily discharge forecasting  
**Mukesh K. Tiwari and Chandranath Chatterjee**
- 520 Swarm intelligence for groundwater management optimization  
**A. Sedki and D. Ouazar**
- 533 Improving real-time reservoir operation based on combining demand hedging and simple storage management rules  
**Nesa Ilich**
- 545 Logistic regression analysis to estimate contaminant sources in water distribution systems  
**Li Liu, A. Sankarasubramanian and S. Ranji Ranjithan**
- 558 Combined particle swarm optimization and fuzzy inference system model for estimation of current-induced scour beneath marine pipelines  
**M. Zanganeh, A. Yeganeh-Bakhtiary and R. Bakhtyar**
