

# Journal of Hydroinformatics

Official Journal of the IAHR–IWA–IAHS Joint Committee on Hydroinformatics

volume 14 | issue 3 | July 2012

## Contents

- 537 Computational decision analysis for flood risk management in an uncertain future  
**Hamish Harvey, Jim Hall and Roger Peppé**
- 562 Generalizing WDN simulation models to variable tank levels  
**Orazio Giustolisi, Luigi Berardi and Daniele Laucelli**
- 574 Spatio-temporal prediction of suspended sediment concentration in the coastal zone using an artificial neural network and a numerical model  
**B. Bhattacharya, T. van Kessel and D. P. Solomatine**
- 585 Contaminant source characterization in water distribution systems using binary signals  
**Jitendra Kumar, E. Downey Brill, G. Mahinthakumar and S. Ranji Ranjithan**
- 603 The potential of graphical processing units to solve hydraulic network equations  
**P. A. Crous, J. E. van Zyl and Y. Roodt**
- 613 Data-mining approach to investigate sedimentation features in combined sewer overflows  
**M. Carbone, L. Berardi, D. Laucelli and P. Piro**
- 628 Gene-expression programming to predict pier scour depth using laboratory data  
**Mujahid Khan, H. Md. Azamathulla and M. Tufail**
- 646 Failure Experience Improvement System (FEIS) for water supply systems  
**Aditya Lukas, Ernest Mayr, Max Ruhri, Harald Katzmaier and Reinhard Perfler**
- 659 Comparison of four models to rank failure likelihood of individual pipes  
**Yehuda Kleiner and Balvant Rajani**
- 682 Hydraulic performance analysis of sewer systems with uncertain parameters  
**Seyed Mahmood Hosseini and Ali Ghasemi**
- 697 A novel hybrid mechanistic-data-driven model identification framework using NSGA-II  
**Soroosh Sharifi and Arash Massoudieh**

- 716 Development of an integrated computational tool to improve performance of irrigation districts  
**L. Pérez Urrestarazu, J. A. Rodríguez Díaz, E. Camacho Poyato, R. López Luque and F. M. Borrego Jaraba**
- 731 Comparison of multivariate adaptive regression splines with coupled wavelet transform artificial neural networks for runoff forecasting in Himalayan micro-watersheds with limited data  
**Jan Adamowski, Hiu Fung Chan, Shiv O. Prasher and Vishwa Nath Sharda**
- 745 A well-balanced spectral volume scheme with the wetting–drying property for the shallow-water equations  
**Luca Cozzolino, Renata Della Morte, Giuseppe Del Giudice, Anna Palumbo and Domenico Pianese**
- 761 Resilience and entropy as indices of robustness of water distribution networks  
**R. Greco, A. Di Nardo and G. Santonastaso**
- 772 Lattice Boltzmann method for 2D flows in curvilinear coordinates  
**Ljubomir Budinski**
- 784 Calibration of Xinanjiang model parameters using hybrid genetic algorithm based fuzzy optimal model  
**Wen-Chuan Wang, Chun-Tian Cheng, Kwok-Wing Chau and Dong-Mei Xu**
- 800 An evaluation of nonlinear methods for estimating catchment-scale soil moisture patterns based on topographic attributes  
**Michael L. Coleman and Jeffrey D. Niemann**
- 815 Development of dynamic three-dimensional coastal information system: a case study in Hong Kong  
**Bi Yu Chen, Jianzhong Lu, Onyx W. H. Wai and Xiaoling Chen**
