

# Journal of Hydroinformatics

Official Journal of the IAHR–IWA–IAHS Joint Committee on Hydroinformatics

volume 14 | issue 4 | October 2012

## Contents

- 829 GSM-enabled remote monitoring of rural handpumps: a proof-of-concept study  
**Patrick Thomson, Rob Hope and Tim Foster**
- 840 Community modeling systems: classification and relevance to hydrologic modeling  
**Bo Lu and Michael Piasecki**
- 857 Hydroinformatics in multi-colours—part green: applications in aquatic ecosystem modelling  
**Hong Li, Arthur E. Mynett and Qing Hua Ye**
- 872 On the prediction of underground water pipe failures: zero inflation and pipe-specific effects  
**Theodoros Economou, Zoran Kapelan and Trevor C. Bailey**
- 884 Integration of urban runoff and storm sewer models using the OpenMI framework  
**Ying-Po Liao, Shiu-Shin Lin and Hung-Sung Chou**
- 902 Estimating the impacts and uncertainty of changing spatial input data resolutions on streamflow simulations in two basins  
**X. Zhang, G. Hörmann, N. Fohrer and J. Gao**
- 918 Semantic model for flood management  
**Julián Garrido, Ignacio Requena and Stefano Mambretti**
- 937 GP approach for critical submergence of intakes in open channel flows  
**H. Md. Azamathulla and Z. Ahmad**
- 944 Modelling provenance in hydrologic science: a case study on streamflow forecasting  
**Yanfeng Shu, Kerry Taylor, Prasantha Hapuarachchi and Chris Peters**
- 960 The extension of EPANET source code to simulate unsteady flow in water distribution networks with variable head tanks  
**Diego Avesani, Maurizio Righetti, Davide Righetti and Paolo Bertola**
- 974 Improving prediction accuracy of river discharge time series using a Wavelet-NAR artificial neural network  
**Shouke Wei, Depeng Zuo and Jinxi Song**

- 992 Leakage fault detection in district metered areas of water distribution systems  
**D. G. Eliades and M. M. Polycarpou**
- 1006 Comparison of statistical methods for downscaling daily precipitation  
**Getnet Y. Muluye**
- 1024 A fuzzy approach for considering uncertainty in transient analysis of pipe networks  
**Ali Haghghi and Alireza Keramat**
- 1036 Evaluation of regional droughts using monthly gridded precipitation for Korea  
**Syed Zakir Hossein, Han Man Shin and Choi Gyewoon**
- 1051 Principal component analysis of surface water quality data of the River Drava in eastern Croatia (24 year survey)  
**Vlatka Gvozdić, Josip Brana, Nela Malatesti and Danijela Roland**
- 1061 Parameter calibration and uncertainty estimation of a simple rainfall-runoff model in two case studies  
**X. Zhang, G. Hörmann, N. Fohrer and J. Gao**
- 1075 Evaluating the adequateness of kinematic-wave routing for flood forecasting in midstream channel reaches of Taiwan  
**Kwan Tun Lee and Pin-Chun Huang**
