Contents

Water Prediction and Control Technology

229 Editorial: Water prediction and control technology
Peter-Jules van Overloop, Rudy R. Negenborn and Dirk Schwanenberg

232 An adaptive predictive approach for river level forecasting
José V. Aguilar, Pedro Langarita, Lorenzo Linares, Manuel Gómez and José Rodellar

246 Continuous nonlinear model predictive control of a hybrid water system
Eelco Nederkoorn, Jan Schuurmans, Joep Grispen and Wytze Schuurmans

258 Tree-based fitted Q-iteration for multi-objective Markov decision processes in water resource management
F. Pianosi, A. Castelletti and M. Restelli

271 Time-instant optimization for hybrid model predictive control of the Rhine-Meuse delta
H. van Ekeren, R. R. Negenborn, P. J. van Overloop and B. De Schutter

293 Coordinating multiple model predictive controllers for the management of large-scale water systems
Abhay Anand, Stefano Galelli, Lakshminarayanan Samavedham and Sitanandam Sundaramoorthy

306 Transition mode of long distance water delivery project before freezing in winter
Guoqiang Liu, Guanghua Guan and Changde Wang

321 Adaptive control of algae detachment in regulated canal networks
Ophélie Fovet, Xavier Litrico, Gilles Belaud and Olivier Genthon

335 Distributed tree-based model predictive control on a drainage water system
J. M. Maestre, L. Raso, P. J. van Overloop and B. De Schutter

348 Modelling and optimized water management of artificial inland waterway systems
J. Wagenpfeil, E. Arnold, H. Linke and O. Sawodny

366 Flooding management using hybrid model predictive control: application to the Spanish Ebro River
J. Romera, C. Ocampo-Martinez, V. Puig and J. Quevedo

Research papers

381 A Bayesian approach to probabilistic streamflow forecasts
Hui Wang, Brian Reich and Yeo Howe Lim
392 Enhanced accuracy of rainfall-runoff modeling with wavelet transform
Chien-ming Chou

405 Modeling of radial well lateral screens using 1D finite elements
M. Dimkic, V. Rankovic, N. Filipovic, B. Stojanovic, V. Isailovic, M. Pusic and M. Kojic

416 Dynamic soft sensors for detecting factors affecting turbidity in drinking water
Petri Juntunen, Mika Liukkonen, Markku J. Lehtola and Yrjö Hiltunen

427 Geomorphology-based genetic programming approach for rainfall-runoff modeling
Vahid Nourani, Mehdi Komasi and Mohamad Taghi Alami

446 A generic approach in estimating vegetation density for hydrodynamic roughness parameterization using high density airborne laser scanning data
M. Z. A. Rahman, B. Gorte, M. Menenti and A. L. Ibrahim

464 Evaluation of a near-real time NEXRAD DSP product in evolution of heavy rain events on the Upper Guadalupe River Basin, Texas
Xianwei Wang, Hongjie Xie, Newfel Mazari, Jon Zeitler, Hatim Sharif and Weldon Hammond

486 Improving reliability of river flow forecasting using neural networks, wavelets and self-organising maps
Mukesh K. Tiwari, Ki-Young Song, Chandranath Chatterjee and Madan M. Gupta

503 Nitrate leaching from a potato field using adaptive network-based fuzzy inference system
Hosein Shekofteh, Majid Afyuni, Mohammad Ali Hajabassi, Bo V. Iversen, Hossein Nezamabadi-pour, Fariborz Abassi and Farid Sheikholeslam

516 Estimation of current-induced pile groups scour using a rule-based method
N. Ghaemi, A. Etemad-Shahidi and B. Ataie-Ashtiani

529 Optimization of pollution control performance of wet detention ponds in tropical urban catchments using particle swarm optimization
Salisu Dan’azumi, Supiah Shamsudin and Azmi Aris

540 Artificial neural network (ANN) modeling of dynamic effects on two-phase flow in homogenous porous media
Navraj S. Hanspal, Babatunde A. Allison, Lipika Deka and Diganta B. Das

555 Application of the stochastic model for temporal rainfall disaggregation for hydrological studies in north western England
M. Abdellatif, W. Atherton and R. Alkhaddar

568 Enhanced DEM-based flow path delineation methods for urban flood modelling
J. P. Leitão, D. Prodanovic, S. Boonya-aroonnet and Č. Maksimovic

580 Hydro-NEXRAD-2: real-time access to customized radar-rainfall for hydrologic applications
Witold F. Krajewski, Anton Kruger, Satpreet Singh, Bong-Chul Seo and James A. Smith

591 Stochastic order-based optimal design of a surface reservoir–irrigation district system
Hosein Alizadeh and S. Jamshid Mousavi

607 Seeking optimal groundwater pumping strategies at Pinggu District in Beijing, China
A. L. Yang, G. H. Huang, X. S. Qin, L. Li and W. Li

620 Book Review
Ognjen Bonacci
