Contents

Towards improved real-time management of urban water systems

623 Editorial: Towards improved real-time management of urban water systems
Zoran Kapelan

625 Application of an optimal predictive controller for a small water distribution network in Luxembourg
David Fiorelli, Georges Schutz, Nataliya Metla and Joel Meyers

634 Geostatistical techniques for approximate location of pipe burst events in water distribution systems
Michele Romano, Zoran Kapelan and Dragan A. Savić

652 Online simplification of water distribution network models for optimal scheduling
Daniel Paluszczyszyn, Piotr Skworcow and Bogumil Ulanicki

666 Experimental investigation of leak hydraulics
M. Ferrante, C. Massari, E. Todini, B. Brunone and S. Meniconi

676 Formulation of a fast 2D urban pluvial flood model using a cellular automata approach
Bidur Ghimire, Albert S. Chen, Michele Guidolin, Edward C. Keedwell, Slobodan Djordjević and Dragan A. Savić

687 Flood analysis of urban drainage systems: Probabilistic dependence structure of rainfall characteristics and fuzzy model parameters
Guangtao Fu and Zoran Kapelan

700 A general multi-objective hyper-heuristic for water distribution network design with discoloration risk
Kent McClymont, Ed Keedwell, Dragan Savić and Mark Randall-Smith

Research papers

717 Real-time urban flood forecasting and modelling – a state of the art
Justine Henonin, Beniamino Russo, Ole Mark and Philippe Gourbesville

737 Least-cost design of water distribution systems under demand uncertainty: the robust counterpart approach
Lina Perelman, Mashor Housh and Avi Ostfeld

751 A methodology for probabilistic real-time forecasting – an urban case study
Jeanne-Rose René, Henrik Madsen and Ole Mark

763 Evolutionary data-modelling of an innovative low reflective vertical quay
C. Altomare, X. Gironella and D. Laucelli
780 Particle method of characteristics (PMOC) for unsteady pipe flow
Yao-Hsin Hwang, Ho-Shuenn Huang, Nien-Mien Chung and Pai-Yi Wang

798 Integrating evolution strategies and genetic algorithms with agent-based modeling for flushing a contaminated water distribution system
Emily M. Zechman

813 Calibration of a 2-D morphodynamic model using water–sediment flux maps derived from an ADCP recording
Massimo Guerrero, Vittorio Di Federico and Alberto Lamberti

829 Conjunction of SOM-based feature extraction method and hybrid wavelet-ANN approach for rainfall–runoff modeling
Vahid Nourani and Masoumeh Parhizkar

849 Exploring the potential of SRTM topographic data for flood inundation modelling under uncertainty
Kun Yan, Giuliano Di Baldassarre and Dimitri P. Solomatine

862 An agent-based modeling framework for sociotechnical simulation of water distribution contamination events
M. Ehsan Shafiee and Emily M. Zechman

881 SARA – An enhanced curve number-based tool for estimating direct runoff
Rafael Hernández-Guzmán and Arturo Ruiz-Luna

888 Development of a self-rechargeable digital water flow meter
Songhao Wang and Ronald Garcia

897 Short-term forecasting of urban storm water runoff in real-time using extrapolated radar rainfall data
S. Thorndahl and M. R. Rasmussen

913 An improved numerical scheme for the approximate solution of the Parabolic Wave model
Luigi Cimorelli, Luca Cozzolino, Renata Della Morte and Domenico Pianese

926 Credibility analysis of computational fluid dynamic simulations for compound channel flow
M. S. Filonovich, R. Azevedo, L. R. Rojas-Solórzano and J. B. Leal

939 Sensitivity analysis of bridge pier scour depth predictive formulae
Roberto Gaudio, Ali Tafarojnoruz and Samuele De Bartolo

952 Forecasting tropical cyclone intensity change in the western North Pacific
Gwo-Fong Lin, Po-Kai Huang and Hsuan-Yu Lin

967 Sensitivity-guided evaluation of the HBV hydrological model parameterization
M. B. Zelelew and K. Alfredsen

991 Water renewal timescales in an ecological reconstructed lagoon in China
Xueping Gao, Yuanyuan Chen and Chen Zhang

1002 Identification of dominant sources of sea level pressure for precipitation forecasting over Wales
Azadeh Ahmadi and Dawei Han

1022 Wavelets-based non-linear model for real-time daily flow forecasting in Krishna River
R. Maheswaran and Rakesh Khosa

1042 A deterministic approach for optimization of booster disinfection placement and operation for a water distribution system in Beijing
Fanlin Meng, Shuming Liu, Avi Ostfeld, Chao Chen and Alejandra Burchard-Levine
