Contents

531 Sociotechnical risk assessment for water distribution system contamination threats
   Amin Rasekh, M. Ehsan Shafiee, Emily Zechman and Kelly Brumbelow

550 Gene expression models for prediction of dam breach parameters
   Ahmed M. A. Sattar

572 Development of a hydro-environmental model for inland navigational canals
   Dongfang Liang, Rebecca W. Zeckoski and Xiaolin Wang

588 Impact of model complexity and precipitation data products on modeled streamflow
   Kenneth J. Tobin and Marvin E. Bennett

600 Improved solution reliability through generalised finite integral methods
   A. G. Barnett

617 Pattern matching and associative artificial neural networks for water distribution system
   time series data analysis
   S. R. Mounce, R. B. Mounce, T. Jackson, J. Austin and J. B. Boxall

633 Regionalization of landscape characteristics to map hydrologic variables
   H. M. Peterson, J. L. Nieber, R. Kanivetsky and B. Shmagin

649 Model-based leak detection and location in water distribution networks considering an
   extended-horizon analysis of pressure sensitivities
   Myrna V. Casillas Ponce, Luis E. Garza Castañón and Vicenç Puig Cayuela

671 Multi-step streamflow forecasting using data-driven non-linear methods in contrasting
   climate regimes
   Daniel J. Karran, Efrat Morin and Jan Adamowski
690 Analytical and experimental investigation of chlorine decay in water supply systems under unsteady hydraulic conditions

Angeliki Aisopou, Ivan Stoianov, Nigel Graham and Bryan Karney

710 Development of an integrated computational tool to assess climate change impacts on water supply-demand and flood inundation

Pao-Shan Yu, Tao-Chang Yang, Chen-Min Kuo and Shien-Tsung Chen

731 Capacity reliability of water distribution systems

J. Vaabel, T. Koppel, L. Ainola and L. Sarv
