

Journal of Hydroinformatics

Official Journal of the IAHR–IWA–IAHS Joint Committee on Hydroinformatics

volume 17 | issue 2 | March 2015

Contents

- 163 Invited Editorial
An enquiry into the place of systems analysis in the politics of water and the environment
J. Philip O’Kane
- 176 Water and the city: exploring links between urban growth and water demand management
Dimitrios Bouziotas, Evangelos Rozos and Christos Makropoulos
- 193 Resilience-based failure mode effects and criticality analysis for regional water supply system
Hwee Hwang, Kevin Lansey and Daniel R. Quintanar
- 211 Development of priority setting process for the small stream restoration projects using multi criteria decision analysis
Jung Pyo Seo, Woncheol Cho and Tae Sung Cheong
- 226 Estimation of scour depth around circular piers: applications of model tree
Amir Etemad-Shahidi, Lisham Bonakdar and D.-S. Jeng
- 239 Reorganization of water demand under changing conditions with possibilistic programming
Mike Spiliotis, Luis Garrote and Adriana Chavez-Jimenez
- 260 Towards standard metadata to support models and interfaces in a hydro-meteorological model chain
Quillon Harpham and Emanuele Danovaro
- 275 Fish tracking in vertical slot fishways using computer vision techniques
Álvaro Rodríguez, María Bermúdez, Juan R. Rabuñal and Jerónimo Puertas

293 Spatial diversity of chlorine residual in a drinking water distribution system: application of an integrated fuzzy logic technique

Donatella Termini and Gaspare Viviani

307 Improving the rapidity of responses to pipe burst in water distribution systems: a comparison of statistical process control methods

Donghwi Jung, Doosun Kang, Jian Liu and Kevin Lansey
