Aims and Scope

Journal of Hydroinformatics is a peer-reviewed journal devoted to the application of information technology in the widest sense to problems of the aquatic environment. It will strive to promote Hydroinformatics as a cross-disciplinary field of study, combining technological, human-sociological and more general environmental interests, including an ethical perspective.

Contributions will be published in the following areas:

- Physical based simulation modelling
- Numerical methods
- Data-driven modelling and management
- Artificial neural networks
- Evolutionary methods
- Cellular automata
- Modelling systems
- Geographic information systems and virtual imaging
- Environmental impact assessment
- Knowledge engineering and management
- Socio-economic framework
- Intelligent decision support, negotiation and management
- tools, environments and languages

Submissions

All manuscripts should be submitted electronically through our Online Submission and Peer Review System:
http://www.editorialmanager.com/hydro. Authors should prepare their papers in accordance with the current Instructions for Authors, available at http://iwaponline.com/author/instructions, or from the Editorial Office at the address given inside the back cover.
