

# Journal of Hydroinformatics

Official Journal of the IAHR–IWA–IAHS Joint Committee on Hydroinformatics

volume 18 | issue 6 | November 2016

## Contents

- 919 Source identification of sudden contamination based on the parameter uncertainty analysis  
**Wei Guozhen, Chi Zhang, Yu Li, Liu Haixing and Huicheng Zhou**
- 928 Modelling flows in shallow (fluvial) lakes with prevailing circulations in the horizontal plane: limits of 2D compared to 3D models  
**Andrea Fenocchi, Gabriella Petaccia and Stefano Sibilla**
- 946 Modeling scour depth downstream of grade-control structures using data driven and empirical approaches  
**Kiyoumars Roushangar, Samira Akhgar, Ali Erfan and Jalal Shiri**
- 961 Comparing impacts of parameter and spatial data uncertainty for a grid-based distributed watershed model  
**Younggu Her and Conrad Heatwole**
- 975 Multiple-fault detection in water pipelines using transient-based time-frequency analysis  
**Jilong Sun, Ronghe Wang and Huan-Feng Duan**
- 990 Uncertainty-based flood resiliency evaluation of wastewater treatment plants  
**M. Karamouz, E. Rasoulnia, Z. Zahmatkesh, M. A. Olyaei and A. Baghvand**
- 1007 Sensitivity analysis on the pollutant trapping efficiencies of a novel sewerage overflow screening device  
**M. A. Aziz, M. A. Imteaz, H. M. Rasel and M. Samsuzzoha**
- 1019 Discriminant analysis application in spatiotemporal evaluation of water quality in South Florida  
**Mohammad Haji Gholizadeh, Assefa M. Melesse and Lakshmi Reddi**
- 1033 Assessment of some combinations of hard and fuzzy clustering techniques for regionalisation of catchments in Sefidroud basin  
**Ali Ahani and S. Saeid Mousavi Nadoushani**
- 1055 Evaluation of CMPA precipitation estimate in the evolution of typhoon-related storm rainfall in Guangdong, China  
**Dashan Wang, Xianwei Wang, Lin Liu, Dagang Wang, Huabing Huang and Cuilin Pan**

International Association  
for Hydro-Environment  
Engineering and Research
