Contents

157 Modelling boundary shear stress distribution in open channels using a face recognition technique
Pedro Martinez-Vazquez and Soroosh Sharifi

173 Distribution of mean flow and turbulence statistics in plunge pools
Luis G. Castillo, José M. Carrillo and Fabián A. Bombardelli

191 Modeling of temporal groundwater level variations based on a Kalman filter adaptation algorithm with exogenous inputs
Emmanouil A. Varouchakis

207 Prediction of scour depth around bridge piers using self-adaptive extreme learning machine
Isa Ebtehaj, Ahmed M. A. Sattar, Hossein Bonakdari and Amir Hossein Zaji

225 Exploration of an adaptive merging scheme for optimal precipitation estimation over ungauged urban catchment
Sherien Fadhel, Miguel Angel Rico-Ramirez and Dawei Han

238 Data reconstruction of flow time series in water distribution systems – a new method that accommodates multiple seasonality
Rui Barrela, Conceição Amado, Dália Loureiro and Aisha Mamade

251 Pre-processing of imbalanced samples and the effective contribution in fault diagnosis in wastewater treatment plants
Y. G. Xu, W. K. Deng, B. Song, X. Y. Deng and F. Luo

261 Identification of monthly municipal water demand system based on autoregressive integrated moving average model tuned by particle swarm optimization
Sahbi Boubaker

282 Calibration of the 1D shallow water equations: a comparison of Monte Carlo and gradient-based optimization methods
Asier Lacasta, Mario Morales-Hernández, Javier Burguete, Pilar Brufau and Pilar Garcia-Navarro
299 A WebGIS-based flood control management system for small reservoirs: a case study in the lower reaches of the Yangtze River

Wenjun Chen, Bin He, Junting Ma and Chuanhai Wang

315 Automated convective and stratiform precipitation estimation in a small mountainous catchment using X-band radar data in Central Spain

Carolina Guardiola-Albert, Carlos Rivero-Honegger, Robert Monjo, Andrés Diez-Herrero, Carlos Yagüe, José María Bodoque and Francisco J. Tapiador
