Natural Hazards: Links between Science and Practice

751 Editorial
Natural Hazards: Links between Science and Practice
Ana Milanovic Pesic and Dragan A. Savic

753 Using ensemble systems to study natural processes
Stanislav Yamashkin, Milan Radovanovic, Anatoliy Yamashkin and Darko Vukovic

766 Extreme flood reconstruction by using the 3DNet platform for hydrological modelling
Miloš Stanić, Andrijana Todorović, Željko Vasilić and Jasna Plavšić

784 Improved input to distributed hydrologic model in areas with sparse subdaily rainfall data using multivariate daily rainfall disaggregation
Marija Ivković, Andrijana Todorović and Jasna Plavšić

798 Flow dynamics in large tidal delta of the Northern Dvina River: 2D simulation
Andrei M. Alabyan and Serafima V. Lebedeva

Research Papers

815 Experimental investigation into techniques to predict leak shapes in water distribution systems using vibration measurements
Joseph D. Butterfield, Gregory Meyers, Viviana Meruane, Richard P. Collins and Stephen B. M. Beck

829 Return period assessment of urban pluvial floods through modelling of rainfall–flood response
Damian Murla Tuyls, Søren Thorndahl and Michael R. Rasmussen

846 Setting up a water quality ensemble forecast for coastal ecosystems: a case study of the southern North Sea
Lőrinc Mészáros and Ghada El Serafy

864 Responses of hydrological model equifinality, uncertainty, and performance to multi-objective parameter calibration
Younggu Her and Chounghyun Seong
886  
**In-situ bioremediation of groundwater using a meshfree model and particle swarm optimization**  
Meenal Mategaonkar, T. I. Eldho and Sahajanand Kamat

898  
A fractional-order infiltration model to improve the simulation of rainfall/runoff in combination with a 2D shallow water model  
J. Fernández-Pato, J. L. Gracia and P. García-Navarro

917  
Selected model fusion: an approach for improving the accuracy of monthly streamflow forecasting  
Fereshteh Modaresi, Shahab Araghinejad and Kumars Ebrahimi

934  
Analyses of 2D transient models for vaporous cavitating flows in reservoir-pipeline-valve systems  
Hui Gao, Xuelin Tang, Xiaoqin Li and Xiaoyan Shi

946  
An inexact stochastic optimization model for multi-conflict regional water resources allocation in the south-to-north water benefited area  
Fu Zhenghui, Wang Yuqi, Lu Wentao, Zhao Haojin, Liu Jiaju and Guo HuaiCheng

960  
Improving river stage forecast by bed reconstruction in sinuous bends  
Yan-Ting Lin, Wei-Bo Chen, Yuan-Fong Su, Jen-Yu Han and Jiun-Huei Jang

975  
Wavelet and cuckoo search-support vector machine conjugation for drought forecasting using Standardized Precipitation Index (case study: Urmia Lake, Iran)  
Mehdi Komasi, Soroush Sharghi and Hamid R. Safavi

989  
Regulation of deep groundwater based on MODFLOW in the water intake area of the South-to-North Water Transfer Project in Tianjin, China  
Xiyuan Deng, Fawen Li, Yong Zhao and Shaofei Li
