Aims and Scope

Journal of Hydroinformatics is a peer-reviewed journal devoted to the application of information technology in the widest sense to problems of the aquatic environment. It will strive to promote Hydroinformatics as a cross-disciplinary field of study, combining technological, human-sociological and more general environmental interests, including an ethical perspective.

Contributions will be published in the following areas:

Physically based simulation modelling

Numerical methods

Data-driven modelling and management

Artificial neural networks

Evolutionary methods

Cellular automata

Modelling systems

Geographic information systems and virtual imaging

Ecology and water quality modelling

Environmental impact assessment

Knowledge engineering and management

Socio-economic framework

Intelligent decision support, negotiation and management

Education and training

Internet-based applications

Optimisation and control

Risk analysis, fuzzy logic and management of uncertainty

Tools, environments and languages

Submission

All manuscripts should be submitted electronically through our Online Submission and Peer Review System: <https://www.editorialmanager.com/hydro>. Authors should prepare their papers in accordance with the current *Instructions for Authors*, available at https://iwaponline.com/jh/pages/Instructions_for_authors or from the Editorial Office at the address given inside the back cover.
