Journal of Hydroinformatics

Official Journal of the IAHR–IWA–IAHS Joint Committee on Hydroinformatics

volume 21 | issue 6 | November 2019

Contents

945 GoRoSoBo simplified: an accurate feedback control algorithm in real time for irrigation canals
Enrique Bonet, Manuel Gómez, M. T. Yubero and J. Fernández-Francos

962 Ensemble of constraint-handling techniques for solving reservoir scheduling problems
Tengfei Hu, Yong Shi, Zhenyu Luan, Yifan Xu and Jingqiao Mao

980 Prediction of side thermal buoyant discharge in the cross flow using multi-objective evolutionary polynomial regression (EPR-MOGA)
Milad Khosravi and Mitra Javan

999 Cellular time series: a data structure for spatio-temporal analysis and management of geoscience information
Sina Nabaei and Bahram Saghafian

1014 Evaluation of the effective parameters on energy losses of rectangular and circular culverts via kernel-based approaches
Kiyoumars Roushangar, Ghazaleh Nasssaji Matin, Roghayeh Ghasempour and Seyed Mahdi Saghebian

1030 Optimal selection of number and location of pressure sensors in water distribution systems using geostatistical tools coupled with genetic algorithm
Fattah Soroush and Mohammad J. Abedini

1048 Linear model of water movements for large-scale inverted siphon in water distribution system
Mao Zhonghao, Guan Guanghua, Yang Zhonghua and Zhong Ke

1064 Web-based geospatial platform for the analysis and forecasting of sedimentation at culverts
Haowen Xu, Marian Muste and Ibrahim Demir

1082 Estimation of scour depth around submerged weirs using self-adaptive extreme learning machine
M. Rashki Ghaleh Nou, M. Azhdary Moghaddam, M. Shafai Bajestan and H. Md. Azamathulla

1102 Multivariate and multi-scale generator based on non-parametric stochastic algorithms
Đurica Marković, Siniša Ilić, Dragutin Pavlović, Jasna Plavšić and Nesa Ilich

IWA PUBLISHING

IAHR AIRH International Association for Hydro-Environment Engineering and Research

Supported by Spain Water and IWHR, China

IAHS AISH

1118 Combining hydro-economic and water quality modeling for optimal management of a degraded watershed
Angelos Alamanos, Dionysios Latinopoulos, Stefanos Xenarios, Georgios Tziatzios, Nikitas Mylopoulos and Athanasios Loukas

1130 A process-based numerical approach to estimate forest groundwater consumption in flatland petrocalcic soils
C. R. Mujica, G. M. Milione, S. A. Bea and J. E. Gyenge

1147 Modeling saltwater intrusion using an integrated Bayesian model averaging method in the Pearl River Delta
Kairong Lin, Pengyu Lu, Chong-Yu Xu, Xuan Yu, Tian Lan and Xiaohong Chen

1163 A knowledge-based method for the automatic determination of hydrological model structures
Jingchao Jiang, A-Xing Zhu, Cheng-Zhi Qin and Junzhi Liu
