Aims and Scope

Journal of Hydroinformatics is a peer-reviewed journal devoted to the application of information technology in the widest sense to problems of the aquatic environment. It will strive to promote Hydroinformatics as a cross-disciplinary field of study, combining technological, human-sociological and more general environmental interests, including an ethical perspective.

Contributions will be published in the following areas:

Physically based simulation modelling
Numerical methods
Data-driven modelling and management
Artificial neural networks
Evolutionary methods
Cellular automata
Modelling systems
Geographic information systems and virtual imaging
Ecology and water quality modelling
Environmental impact assessment
Knowledge engineering and management
Socio-economic framework
Intelligent decision support, negotiation and management
Education and training
Internet-based applications
Optimisation and control
Risk analysis, fuzzy logic and management of uncertainty
Tools, environments and languages

Submission

All manuscripts should be submitted electronically through our Online Submission and Peer Review System: <https://www.editorialmanager.com/hydro>. Authors should prepare their papers in accordance with the current *Instructions for Authors*, available at https://iwaponline.com/jh/pages/Instructions_for_authors, or from the Editorial Office at the address given inside the back cover.
