

# Journal of Hydroinformatics

Official Journal of the IAHR–IWA–IAHS Joint Committee on Hydroinformatics

volume 23 | issue 2 | March 2021

## Contents

- iii Editorial: Important news about this journal
- 211 Simulation and optimization of control system operation and surface water allocation based on system dynamics modeling  
**Hamed Nozari, Parya Moradi and Ehsan Godarzi**
- 231 Investigations of hydraulic transient flows in pressurized pipeline based on 1D traditional and 3D weakly compressible models  
**Guohong Wu, Xiangyu Duan, Jianghui Zhu, Xiaoqin Li, Xuelin Tang and Hui Gao**
- 249 Multi-source data fusion method for structural safety assessment of water diversion structures  
**Sherong Zhang, Ting Liu and Chao Wang**
- 267 Improving the integrated hydrological simulation on a data-scarce catchment with multi-objective calibration  
**Qianwen He and Frank Molkenhain**
- 284 Numerical study of energy dissipation and block barriers in stepped spillways  
**Mehdi Karami Moghadam, Ata Amini and Ehsan Karami Moghadam**
- 298 Estimation of parameters in groundwater modelling by modified Clonalg  
**Miraç Eryiğit**
- 307 Ensemble-based machine learning approach for improved leak detection in water mains  
**Thambirajah Ravichandran, Keyhan Gavahi, Kumaraswamy Ponnambalam, Valentin Burtea and S. Jamshid Mousavi**
- 324 Design of an automatic hydro-meteorological observation network for a real-time flood warning system: a case study of Vu Gia-Thu Bon river basin, Vietnam  
**Liem D. Nguyen, Hong T. Nguyen, Phuong D. N. Dang, Trung Q. Duong and Loi K. Nguyen**
- 340 Hydrological model optimization using multi-gauge calibration (MGC) in a mountainous region  
**Sead Ahmed Swalih and Ercan Kahya**

International Association  
for Hydro-Environment  
Engineering and Research

Supported by  
Spain Water and IWHR, China

- 352 A data-driven approach to assessing the impact of water harvesting structures on regional water storage in East Africa  
**J. A. Eisma and V. Merwade**
- 368 Data pre-processing and artificial neural networks for tidal level prediction at the Pearl River Estuary  
**Bing-Xian Liang, Jin-Peng Hu, Cheng Liu and Bo Hong**
