

Contents

- 223 Demonstration of the impacts of anti-sedimentation techniques on Japanese reservoir siltation via mass data ANN analysis
Tobias Landwehr, Sameh Ahmed Kantoush, Daisuke Nohara, Tetsuya Sumi and Claudia Pahl-Wostl
- 243 The effect of triangular prismatic elements on the hydraulic performance of stepped spillways in the skimming flow regime: an experimental study and numerical modeling
Kiyomars Roushangar, Samira Akhgar and Saman Shahnazi
- 259 Near real-time detection of blockages in the proximity of combined sewer overflows using evolutionary ANNs and statistical process control
T. R. Rosin, Z. Kapelan, E. Keedwell and M. Romano
- 274 Tocap: a web tool for ad-hoc campaign planning in terrestrial hydrology
Erik Nixdorf, Daniel Eggert, Peter Morstein, Thomas Kalbacher and Doris Dransch
- 295 Characterizing water quality datasets through multi-dimensional knowledge graphs: a case study of the Bogota river basin
Juan D. Rondón Díaz and Luis M. Vilches-Blázquez
- 315 A balanced watershed decomposition method for rain-on-grid simulations in HEC-RAS
Sleimane Hariri, Sylvain Weill, Jens Gustedt and Isabelle Charpentier
- 333 Evaluation of hydrodynamic behavior of biosand filters using computational fluid dynamics combined with the design of experiments
Dominique Martins Sala, Ricardo Vicente de Paula Rezende and Sandro Rogério Lautenschlager
- 350 Incorporating non-uniformity and non-linearity of hydrologic and catchment characteristics in rainfall-runoff modeling using conceptual, data-driven, and hybrid techniques
Vikas Kumar Vidyarthi and Ashu Jain
- 367 A novel medium- and long-term runoff combined forecasting model based on different lag periods
Ping Ai, Yanhong Song, Chuansheng Xiong, Binbin Chen and Zhaoxin Yue
- 388 Urban land-use land-cover extraction for catchment modelling using deep learning techniques
Siming Gong, James Ball and Nicholas Surawski

International Association
for Hydro-Environment
Engineering and Research

Supported by
Spain Water and IWH, China

- 406 Comparison of classic object-detection techniques for automated sewer defect detection
Qianqian Zhou, Zuxiang Situ, Shuai Teng, Weifeng Chen, Gongfa Chen and Jiongheng Su
- 420 Application of short time series analysis for the hydrodynamic characterization of a coastal karst aquifer: the Salento aquifer (Southern Italy)
Gabriella Balacco, Maria Rosaria Alfio, Alessandro Parisi, Andreas Panagopoulos and Maria Dolores Fidelibus
- 444 Semi-analytical model for TSI estimation of inland water bodies from Sentinel 2 imagery
P. Y. Sherjah, N. Sajikumar and P. T. Nowshaja
- 464 Adoption of Machine Learning Technique in Nile River Islands Classification
Noha Kamal, Ahmad A. Aziz El-Banna and Nagwa El-Ashmawy
- 481 Effect of ship-lock-induced surges on navigation safety in a branched lower approach channel system
Zhiyong Wan, Yun Li, Xiaogang Wang, Jianfeng An, Long Cheng and Yipeng Liao
