Contents

239 Implications of climate and urban development on the design of sustainable urban drainage systems (SUDS)
   Annette Semadeni-Davies

257 Spatial risk-based assessments for climate adaptation using the SimCLIM modelling system: a case study of domestic rainwater harvesting as the sole source of water
   R. Warrick, G. Ashford, P. Kouwenhoven, Y. Li, P. Urich and W. Ye

266 Carbon footprint and life cycle assessment of centralised and decentralised handling of wastewater during rain
   Jes Clauson-Kaas, Birgitte Lilholt Sørensen, Ole G. Dalgaard, Anitha K. Sharma, Niels Bent Johansen, Kim Rindel and Helle K. Andersen

276 Assessment of vulnerability of river basins in Ghana to water stress conditions under climate change
   Emmanuel Obuobie, Kwabena Kankam-Yeboah, Barnabas Amisigo, Yaw Opoku-Ankomah and Deborah Ofori

287 The potential for thermal energy recovery from wastewater treatment works in southern England
   Christopher Hawley and Richard Fenner

300 Rural livelihoods and household adaptation to desiccation in the Okavango Delta, Botswana
   Moseki R. Motsholapheko, Cornelis Vanderpost and Donald L. Kgathi
