Contents

161 Managing water-related energy in future cities – a research and policy roadmap
   S. Kenway, J. McMahon, V. Elmer, S. Conrad and J. Rosenblum

176 Reducing life-cycle carbon footprints in the redesign of water distribution systems
   Innocent Basupi, Zoran Kapelan and David Butler

193 A hydrological perspective on evaporation: historical trends and future projections in Britain
   A. L. Kay, V. A. Bell, E. M. Blyth, S. M. Crooks, H. N. Davies and N. S. Reynard

209 Integrated modelling of a coupled water-agricultural system using system dynamics
   Janez Susnik, Lydia S. Vamvakeridou-Lyroudia, Dragan A. Savić and Zoran Kapelan

232 Improving the performance of an integrated urban wastewater system under future climate change and urbanisation scenarios
   Maryam Astaraie-Imani, Zoran Kapelan and David Butler

244 Secular variation in rainfall and intensity–frequency–duration curves in Eastern Australia
   Yi-Ru Chen, Bofu Yu and Graham Jenkins

252 Detecting evolution trends in the recorded runoffs from the major rivers in China during 1950–2010
   G. Q. Wang, X. L. Yan, J. Y. Zhang, C. S. Liu, J. L. Jin, Y. L. Liu and Z. X. Bao

265 Return periods of the August 2010 heavy precipitation in northern Bohemia (Czech Republic) in the present climate and under climate change
   Jan Kyselý, Ladislav Gaál, Jan Picek and Martin Schindler

287 Climate projection ensemble as support to water management and irrigation in Nigeria
   M. Santini, R. Valentini and Raffaele Cervigni

302 Assessing the spatio-temporal variation and uncertainty patterns of historical and future projected water resources in China
   Qian Zhu, Hong Jiang, Changhui Peng, Jinxun Liu, Xiuqin Fang, Huai Chen and Shirong Liu
