Contents

Water resources and climate change

239 Water resources and climate change
Kaveh Ostad-Ali-Askar, Ruidan Su and Limin Liu

240 Study on the membrane bioreactor for treating surfactant wastewater
Zhilin Ran, Jia Zhu, Ke Li, Li Zhou, Pei Xiao and Bing Wang

249 Research on the migration patterns of sea-land transitional zone in the coastal area of Longkou and Zhaoyuan
Changsu Li, Chao Jia, Henghua Zhu and Weijiang Yu

261 Impact of land use/cover change on the relationship between precipitation and runoff in typical area
Bao-qi Li, Wei-hua Xiao, Yi-cheng Wang, Ming-zhi Yang and Ya Huang

275 Microscopic mechanisms of soil moisture related to hydromulching
Gu Jian, Yin Guanghua, Ma Ningning, Sun Zhan-xiang, Li Xue, Wang Shijie and Zhou Xiaole

282 Rainfall variation prediction using SD technology based on temperature model for Weihe River basin
Xuerui Gao, Shibao Lu, Wei Li, Xiaohe Wu and Xiaojing Gan

293 Basic theories and methods of watershed ecological regulation and control system
Shibao Lu, Yizi Shang, Wei Li, Xiaohe Wu and Hongbo Zhang

307 Spatio-temporal data mining and modeling: distribution pattern and governance input efficiency of heavy metal emission in industrial wastewater, China
Xinjian Li, Hong Qiao, Rui Wang, Fei Li and Xiaoling Li

322 Spatial pattern of riparian plants along stream order among mountain rivers in China
Rong Sun, Xiaojie Luo, Xiangyu Meng and Yan Wang

331 Establishing coal-water-wind (solar) energy comprehensive green energy mining system by using mine water
WeiBo Sun, Yan Wang, LeiMing Zhang, YanDa Liu and Xin Wang
338  Eco-environmental water requirements in Shuangtaizi Estuary Wetland based on multi-source remote sensing data  
Qian Cheng, Linfei Zhou and Tie liang Wang

347  Temporal and spatial variations of the Arctic sea ice (1997–2016)  
Xingdong Wang and Zhankai Wu

356  Analysis of the sediment remobilization phenomenon in a rain garden using CSTR theory  
Zhiyu Shao, Shuang Li, Bo Lv, Hongxiang Chai, Lianggen Ao, Xiaoyuan Zhang, Wenqian Li and Qiang He

367  Analysis of the impact of Shifosi Reservoir water level on underground water  
B. Yan, Y. Xie, C. J. Guo and C. S. Zhao

Other Papers

383  Water-smart sprinkler irrigation, prerequisite to climate change adaptation: a review  
Zakaria Issaka, Hong Li, Jiang Yue, Pan Tang and Ransford Opoku Darko

399  Deficit irrigation and irrigation methods as on-farm strategies to maximize crop water productivity in dry areas  
Hussein M. Al-Ghobari and Ahmed Z. Dewidar

410  An empirical approach for computing surface runoff concentration time  
Shanshan Bao, Xiaojun Wang, Hongyan Li, Hang Lv and Yuening Li
