Contents

1 Disinfection by-products in desalinated and blend water: formation and control strategy
   Shakhawat Chowdhury

25 Modification of the Thomas model for predicting unsymmetrical breakthrough curves using an adaptive
   neural-based fuzzy inference system
   Mohammad Javad Amiri, Maryam Khozaei and Antonio Gil

37 Assessing high-throughput environmental DNA extraction methods for meta-barcode characterization of
   aquatic microbial communities
   Abdolrazagh Hashemi Shahraki, Subba Rao Chaganti and Daniel Heath

50 Occurrence and reduction of F-specific RNA bacteriophage genotypes as indicators of human norovirus at
   a wastewater treatment plant
   Suntae Lee, Mamoru Suwa and Hiroyuki Shigemura

63 Development of a dose–response model for Naegleria fowleri
   Kara Dean, Mark H. Weir and Jade Mitchell

72 Metagenomic study on the composition of culturable and non-culturable bacteria in tap water and biofilms
   at intensive care units
   Maha Farhat, Khaled R. Alkharsah, Fatimah I. Alkhamis and Huda A. Bukharie

84 Weather, environmental conditions, and waterborne Giardia and Cryptosporidium in Iqaluit, Nunavut
   Stephanie Masina, Jamal Shirley, Jean Allen, Jan M. Sargeant, Rebecca A. Guy, Peter M. Wallis,
   J. Scott Weese, Ashlee Cunsolo, Anna Bunce and Sherilee L. Harper

98 Low cost drinking water treatment using nonwoven engineered and woven cloth fabrics
   Stephen Siwila and Isobel C. Brink

113 Fecal coliform concentrations in effluent from ultraviolet disinfection units installed in onsite wastewater
   treatment systems
   Meagan R. Jackson, John Scott Meschke, Jeremy Simmons and Tania Busch Isaksen

124 Chlorine inactivation of coxsackievirus B5 in recycled water destined for non-potable reuse
   Satiya Wati, Bret S. Robinson, John Mieog, Judy Blackbeard and Alexandra R. Keegan
137 Predicting culturable enterococci exceedances at Escambron Beach, San Juan, Puerto Rico using satellite remote sensing and artificial neural networks

Abdiel E. Laureano-Rosario, Andrew P. Duncan, Erin M. Symonds, Dragan A. Savic and Frank E. Muller-Karger

149 Cryptosporidium genotyping and land use mapping for hazard identification and source tracking in a small mixed rural–urban watershed in Southeastern Brazil

Rosane C. Andrade, Rafael K. X. Bastos, Paula D. Bevilacqua and Rosângela V. Andrade

160 Occurrence of free-living amoebae (Acanthamoeba, Balamuthia, Naegleria) in water samples in Peninsular Malaysia

Shobana Gabriel, Naveed Ahmed Khan and Ruqiyyah Siddiqui

172 The association between water, sanitation and hygiene (WASH) conditions and drowning in Bangladesh

Jagnoor Jagnoor, Medhavi Gupta, Kamran Ul Baset, Daniel Ryan, Rebecca Ivers and Aminur Rahman
