Contents

173 New insights towards disinfecting viruses – short notes
   Djamel Ghernaout, Noureddine Elboughdiri and Saleh Al Arni

187 Filtration analysis and fouling mechanisms of PVDF membrane for POME treatment
   Mohd Azwan Ahmad, Bidattul Syirat Zainal, Nashrah Hani Jamadon, Thomas Choong Shean Yaw
   and Luqman Chuah Abdullah

200 Hydrogenotrophic denitrification for treating nitrate contaminated without/with reactive black 5 dye
   Tippawan Singhopon, Kenta Shinoda, Suphatchai Rujakom and Futaba Kazama

214 Enhancing the performance of microbial desalination cells using $\delta$MnO$_2$/graphene nanocomposite as a
   cathode catalyst
   Abdelsalam Elawwad, Mostafa Ragab, Ahmed Hamdy and Dalal Z. Husein

227 Life cycle assessment of cucumber irrigation: unplanned water reuse versus groundwater resources in
   Tipaza (Algeria)
   Latifa Azeb, Tarik Hartani, Nassim Aitmouheb, Ludivine Pradeleix, Nouredddin Hajjaji and
   Soumaya Aribi

239 Physical and economical evaluation of laboratory-scale membrane bioreactor by long-term relative
   cost-benefit analysis
   Mariam Ayub, Nadeeha Saeed, Shinho Chung, Muhammad Saqib Nawaz and Noreddine Ghaffour

251 Experimental investigation of titanium dioxide as an adsorbent for removal of Congo red from aqueous
   solution, equilibrium and kinetics modeling
   Moussa Abbas
