

# Water Reuse

A Journal of the International Water Association

volume 11 | issue 2 | June 2021

## Contents

### Cutting-edge technology and systems for water treatment and reuse

- 147 Editorial: Cutting-edge technology and systems for water treatment and reuse  
**Peng-Kang Jin, Ying-Xue Sun, Can Wang, Huang Huang and Yin-Hu Wu**
- 149 Revealing the membrane fouling mechanism caused by the denitrification filter effluent during ozonation by model assessment  
**Yuan Bai, Yin-Hu Wu, Xin Tong, Yun-Hong Wang, Nozomu Ikuno, Wei Wang, Yu-Long Shi and Hong-Ying Hu**
- 160 Investigations on the fouling characteristic of humic acid and alginate sodium in capacitive deionization  
**Huizhong Zhang, Jiayu Tian, Xiujuan Hao, Dongmei Liu and Fuyi Cui**
- 177 Microcoagulation improved the performance of the UF-RO system treating the effluent from a coastal municipal wastewater treatment plant: a pilot-scale study  
**Tong Yu, Chenlu Xu, Feng Chen, Haoshuai Yin, Hao Sun, Lihua Cheng and Xuejun Bi**
- 189 Advances in efficient desalination technology of capacitive deionization for water recycling  
**Yuhao Tong, Shuang Zhou, Jun Zhou, Guanteng Zhang, Xiaolin Li, Chunxia Zhao and Pengyan Liu**
- 201 Aggravated biofouling caused by chlorine disinfection in a pilot-scale reverse osmosis treatment system of municipal wastewater  
**Li-Wei Luo, Yin-Hu Wu, Yun-Hong Wang, Xin Tong, Yuan Bai, Gen-Qiang Chen, Hao-Bin Wang, Nozomu Ikuno and Hong-Ying Hu**
- 212 The removal efficiencies and mechanism of aniline degradation by peroxydisulfate activated with magnetic Fe-Mn oxides composite  
**Lin Qiao, Yu Shi, Qingli Cheng, Bingtao Liu and Jing Liu**
- 224 Photocatalytic degradation of hydrocarbons and methylene blue using floatable titanium dioxide catalysts in contaminated water  
**T. Schnabel, N. Jautzus, S. Mehling, C. Springer and J. Londong**

- 236 Application of an integrated dissolved ozone flotation process in centralised fracturing wastewater treatment plant  
**Zhuodi Yao, Xin Jin, Jingwen Liang, Rui Wang, Pengkang Jin, Guangping Li, Liushuan Yao and Zhe Wang**
- 248 Adsorption of tylosin in wastewater by iron-rich farmland soil and the effect of iron reduction and common cations  
**Luoying Lin, Xingbao Hu, Jianming Liang, Zhujiang Huang, Guangwei Yu and Yunxiao Chong**
- 257 Feeding preparation strategy for the supercritical water oxidation (SCWO) system for disposing of liquid hazardous waste  
**Bo Wang, Meng Lu, Lixin Zhao, Zhezhou Zhang, Yihua Zhao and Songyan Qin**
- 268 1,4-dioxane degradation using a pulsed switching peroxi-coagulation process  
**Yaobin Lu, Hualei Shi, Jialiang Yao, Guangli Liu, Haiping Luo and Renduo Zhang**
- 279 Recycling of rural abandoned constructed wetlands: mariculture wastewater treatment  
**Yu Xin, Lin Liu, Lili Wei, Xu Huang and Chaoxiang Liu**
- 289 Copper removal from semiconductor CMP wastewater in the presence of nano-SiO<sub>2</sub> through biosorption  
**Xiaoyu Wang, Gude Buer, Wei Fan, Lei Gao and Mingxin Huo**
- 301 Influence of light quality on *Chlorella* growth, photosynthetic pigments and high-valued products accumulation in coastal saline-alkali leachate  
**Xiao-ya Liu, Yu Hong and Wen-ping Gu**
- 312 Seasonal variations of pollutants removal and microbial activity in integrated constructed wetland-microbial fuel cell systems  
**Xiaouu Wang and Yimei Tian**
