Contents

213 Optimization of isopropyl alcohol degradation by microwave-induced catalytic oxidation process
Quynh Thi Phuong Tran, Chi-Hsu Hsieh, Tung-Yu Yang and Hsin-hsin Tung

225 Colloid clogging of saturated porous media under varying ionic strength and roughness during managed aquifer recharge
Du Xinqiang, Song Yalin, Ye Xueyan and Luo Ran

232 Nanotechnology for water purification: electrospun nanofibrous membrane in water and wastewater treatment
I. Tili and Tawfeeq Abdullah Alkanhal

249 Comparative study of the adsorption capacity of lead (II) ions onto bean husk and fish scale from aqueous solution
Chionyedua T. Onwordi, Cosmas C. Uche, Alechine E. Ameh and Leslie F. Petrik

263 A decision support system for indirect potable reuse based on integrated modeling and futurecasting
A. G. Lodhi, A. N. Godrej, D. Sen, R. Angelotti and M. Brooks

282 Removal of lead ions from water by capacitive deionization electrode materials derived from chicken feathers
T. Alfredy, Y. A. C. Jande and T. Pogrebnaya

292 Effect of bubble characteristics and nozzle size on the membrane distillation enhanced by gas–liquid two-phase flow
Dashuai Zhang, Xiaopeng Zhang, Li Chen, Wang Lili, Wu Di, Yuqin Xiong, Qiang Lin and Zaifeng Shi

301 Effects of inorganic ions on the photocatalytic degradation of carbamazepine
Xiaoya Gao, Qian Guo, Guangbei Tang, Wen Peng, Yongming Luo and Dedong He

310 A study on the design and analysis of a gas engine heat pump water heater using shower wastewater as heat source
Fengguo Liu, Zhenxi Ma and Rui Zhang

319 Experiment and simulation of layered bioretention system for hydrological performance
Chunbo Jiang, Jiake Li, Huaien Li and Yajiao Li
330 Pilot study of a horizontal roughing filtration system treating greywater generated from a peri-urban community in Durban, South Africa

B. F. Bakare, S. Mtsweni and S. Rathilal

Jie Dou
